2020 PRELIMINARY *Event Guide*

JULY 16 - 18, 2020 | DENVER, CO
Gaylord Rockies Resort & Convention Center

Owned & Produced by:

Presented by:

1,750+ dental hygienists • **125+** exhibits • **20** CE credits

WHY ATTEND?

Now in its 20th year, **RDH Under One Roof** is a conference and exhibition exclusively for dental hygienists. RDH Under One Roof is **THE event for the dental hygiene profession.**

*Take it from these hygienists,
this is an event you don't want to miss!*

"By far the best conference for dental hygienists. Not only are the classes excellent, but the networking, and the knowledge gained is priceless. It will renew your excitement in your profession each and every year you attend!"

"There is no feeling like being in the presence of thousands of people who share the same passion. Be prepared to learn new things whether you've been in practice 2 months or 20 years."

"It is the best event of the year!!! Totally dedicated to hygienists. Best speakers and topics. I could spend a full day & more on in Exhibit Hall. Learn and see products you won't find anywhere else."

1,750+
dental hygienists

125+

GENERAL INFORMATION, FAQs, AND EVENT CONTACTS

On-site Registration Hours

Wednesday, July 15	12:00 P.M. – 6:00 P.M.
Thursday, July 16	6:30 A.M. – 6:00 P.M.
Friday, July 17	7:00 A.M. – 6:00 P.M.
Saturday, July 18	7:30 A.M. – 1:00 P.M.

Exhibit Hall Hours

Thursday, July 16	5:00 P.M. – 7:30 P.M.
Friday, July 17	10:00 A.M. – 2:30 P.M. & 5:00 P.M. – 7:30 P.M.
Saturday, July 18	10:00 A.M. – 2:30 P.M.

REGISTRATION

What is included in a full conference registration?

- All general sessions, including the mega, keynote, and wrap-up sessions
- Up to 20 CE credits if you attend only general sessions all three days
- Access to the exhibit hall floor to visit and network with 125+ exhibitors
- Lunch on the exhibit hall floor Friday and Saturday
- Meeting kickoff party on Wednesday evening* and receptions on the exhibit hall floor Friday and Saturday evenings

See page C3 for additional details.

Please note: Workshops are not included in a full conference registration. Additional registration is required to attend workshops.

GENERAL EVENT

How do I get my dentist to help pay my tuition?

- See page 56 for tips on how to justify your trip to your dentist.

What meals are included?

- Full conference attendees receive lunch on Friday and Saturday and drinks and snacks at each of the networking receptions on the exhibit hall floor.

TRAVEL TIPS

How do I book my hotel room?

See page 55 for details.

How do I find a roommate?

- Join our private Facebook group (RDH Under One Roof Official) to become acquainted with fellow attendees.

What do I wear? How should I pack?

- Typical attire for attendees ranges from business casual to casual. It will be hot outside, but the session rooms will be set for 72 degrees. ***This can feel chilly to some, so bring a sweater or light jacket to wear during the day.***

What activities does Aurora offer?

- A lot! See page 54 for a list of activities.

EXHIBIT HALL

Will I have time to visit the exhibit hall?

- Yes, and there is so much to see! Visit the exhibit hall during lunch, in between sessions, and during the evening receptions.
- See pages 47-51 for a full diagram of the exhibit hall and a list of exhibiting companies.

CONFERENCE

What is a general session?

- General sessions are large group courses open to all registered conference attendees. Seating is first come, first served, so come early to get a good seat. No additional registration is needed to attend any of the general sessions.

What is a workshop?

- Workshops are small group courses with hands-on elements. Workshops are ticketed and require additional registration for a nominal fee. If you are more than 15 minutes late to a workshop, you can't get in.

What if I am late to a course?

- In an effort to keep the conference program on schedule, courses start promptly. Be early!
- If you are late to a general session, try to enter the room as quietly as possible and find a seat.
- If you are late to a workshop, you may lose your seat! Workshops are always in high demand and often sell out prior to the event. On-site wait-lists are used to fill empty seats. If you are late, your seat will likely be filled.
- If you miss a workshop, you can choose to attend another workshop that is not already sold out. Check in with registration on-site to work out your specific situation. *Please note: Refunds will **NOT** be issued on missed workshops.*

Will there be course handouts?

- General sessions will have handouts provided online approximately 30 days before the event. All pre-registered attendees will be sent an email notice that the handouts are ready to be printed and downloaded.
- Workshop materials are all provided by the presenter and handed out during the session.

GENERAL INFORMATION, FAQs, AND EVENT CONTACTS

CE Credits

How many credits can I expect to earn while attending UOR?

- You can earn up to 20 CE credits by attending general sessions in every time slot on all three days. This includes attendance at the mega, keynote, and wrap-up sessions.
- Organize your time to fit your needs. The number of CE credits available is indicated on each course. You can maximize your time to earn as many credits as possible—or earn what you need.

How do I collect my CE credits?

- There is a CE kiosk on-site where you can collect your CE certifications of completion and verification. To do this, follow these instructions: At the end of every session you will be given a CE code. Write down the code and visit the CE kiosk when convenient. At the kiosk, log in, take the course evaluation, and print your CE verification. The CE kiosk will be open all three days of the event. CE redemptions may also be done later from home. Customer service support is available via phone and email, if needed.

CE Claim Credit / CE Kiosk Information

Collect your continuing education credits while on-site at the event.

1. Write down the course code, which is provided at the end of each session you attend.
2. Visit the on-site CE kiosk and complete the course evaluation.
3. Print the CE verification.

CE Kiosk Hours:

Thursday, July 16	10:00 A.M. – 6:00 P.M.
Friday, July 17	7:00 A.M. – 6:00 P.M.
Saturday, July 18	7:30 A.M. – 5:30 P.M.

Visit dentalacademyofcontinuingeducation.com to access the full library of self-study CE offered by the Dental Academy of Continuing Education!

Endeavor Business Media is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/goto/cerp. Endeavor's recognition of term extends from 11/1/2019 – 12/31/2021.

Endeavor Business Media
Nationally Approved PACE program provider for FAGD/MAGD credit.
Approval does not imply acceptance by any regulatory authority or AGD endorsement.
11/1/2019 – 10/31/2022.
Provider #: 320452

Endeavor Business Media is designated as an approved Provider by the American Academy of Dental Hygiene, Inc. #AADHHPNW (January 1, 2019 - December 31, 2020). Approval does not imply acceptance by a state or provincial Board of Dentistry. Licensee should maintain this document in the event of an audit.

PROVIDER DISCLOSURE: Endeavor Business Media's Dental Division does not have a leadership or financial/commercial interest in any products or services discussed or shared in any of the educational activities presented at RDH Under One Roof 2020.

PROVIDER/CE PLANNING MEMBERS DISCLOSURE: Craig Dickson, Publisher, has no relevant financial interest that may create a conflict of interest related to RDH Under One Roof. Laura Winfield, Conference Manager, has no relevant financial interest that may create a conflict of interest related to RDH Under One Roof.

CAUTION! Completing a single continuing education activity DOES NOT provide enough information to give the participant the feeling that s/he is an expert on the topic presented. It is a combination of many educational activities and clinical experience that allows the participant to develop skills and expertise.

PROVIDER CONTACT INFORMATION: Laura Winfield, Conference Manager, lwinfield@endeavorb2b.com or direct at 918-831-9869.

Mobile DENTISTRY

WEDNESDAY, JULY 15, 2020

1:00 PM - 4:00 PM 3 CE

A LOOK AT MODERN MOBILE DENTISTRY AS AN EXCITING CAREER CHOICE: THE WHAT, THE WHY, THE HOW

Providing dental hygiene services in non-traditional settings is essential to increase access to care and is an exciting career choice for dental hygienists. Fast paced educational program will support the development of a mobile dentistry program in your community. This course will assist with goal setting, building community awareness, highlight the benefits of interprofessional collaboration, as well as information on providing dental services in settings such as schools, care facilities, and workplaces.

OBJECTIVES:

- Identify the ways in which a dental hygienist can provide mobile dentistry in his/her state, including specifics on scope of practice and collaboration with a dentist.
- Describe the steps necessary to start, build, launch, and scale a non-profit or for-profit mobile program, including an overview of grant writing.
- Explore what it takes to initiate, build, and maintain collaborative relationships within the local community, the dental community, and industry leaders in order to educate and build awareness.
- Describe real-life examples of mobile dental clinics in schools, Headstart and WIC based mobile dental clinics, care facilities, and workplaces.
- Discuss the challenges that mobile clinicians have faced in the past and currently face.

WEDNESDAY, JULY 15, 2020
1:00 PM – 4:00 PM 3 CE

YOUR “MISSION” SHOULD YOU CHOOSE TO ACCEPT IT!

Providing dental hygiene services in non-traditional settings is essential to increase access to care. Adapting preventive care while adhering to the standard precautions will ensure clinicians and patients are kept safe. This course is designed to empower dental professionals with practical steps for successful local community programs or global mission trips.

Amber Auger,
MPH, RDH

Alicia Murria,
MS(c), RDH

Commercially Supported by:

OBJECTIVES:

- Recognize what to look for when choosing an organization to serve with.
- Discover local and global organizations seeking dental professionals.
- Compare practical tools to honor the culture receiving care.
- Review 5 steps to successful dental mission trips local and abroad.
- Identify non-traditional protocols to maximize limited resources.

CONFERENCE DETAILS

For an updated full conference event schedule, please visit www.rdhunderoneroof.com

Courses with commercial support provided by an unrestricted educational grant include the logo of the commercial supporter. Expanded information regarding speakers, session details, and other conference and event information can be found on the RDH Under One Roof website, rdhunderoneroof.com.

General Sessions comprise most of the UOR presentations. They are included in a full conference registration. Seating is first come, first serve, so arrive early to get a good seat!

Mega Sessions, Keynote, and Wrap-up Sessions are all-attendee general sessions and are also included in a full conference registration.

Workshops are small hands-on sessions in a classroom setting. Workshops require additional registration to attend. Workshops sell out quickly! Do not miss the opportunity to attend—register early. If you are more than 15 late to a workshop, you will not be allowed in.

Networking Activities are fun non-CE activities designed to promote fellowship and mentorship with your peers. Be sure to check if an activity requires registration to attend. Lunch on Friday and Saturday and several receptions are included in a full conference registration.

THURSDAY, JULY 16, 2020 | DAY 1

8:00 A.M. – 10:00 A.M.
GENERAL SESSION

Periodontics | 2 CE

Oxygen Is Key for Biofilm Modification, Repopulation, and Long-Term Maintenance

Tanya Dunlap, PhD

OBJECTIVES:

- Discover the benefits and limitations of antimicrobial and mechanical therapies for biofilm control
- Understand how and why antimicrobials with oxidative/reduction reactions effectively manage biofilms
- Learn how to incorporate localized antibiofilm therapies into existing treatment plans
- Discover how to help preserve the health of your implant, cosmetic, and restorative cases

Commercially Supported by:

Biofilms in periodontal pockets regenerate quickly after scaling. Adjunctive therapies, such as antibiotics, have a temporary antimicrobial effect. You can treat your patients more effectively with long-term success using prescription-tray delivery of hydrogen peroxide gel deep into periodontal pockets. Research shows that this delivery combined with SRP leads to more significant pocket depth and bleeding reductions than SRP alone. Attend this presentation to review data on microbial changes during treatment and the science behind the tray delivery and its practical implementation.

8:00 A.M. – 10:00 A.M.
GENERAL SESSION

Ultrasonics | 2 CE

Smart Scaling: Using the staged approach to ultrasonic and hand instrumentation to achieve better clinical outcomes

Joy D. Void-Holmes, DHSc, BSDH, RDH

OBJECTIVES:

- Discuss current research that supports a staged approach to periodontal debridement
- Recognize the importance of cementum preservation
- Review the proper foundational skills in ultrasonic technique and hand instrumentation
- Discuss variables that influence deposit removal using MUI technology
- Examine current trends in sharp-free technology
- Assemble hygiene setups that facilitate thorough removal of deposits with fewer instruments

Commercially Supported by:

The ultimate goal of manual and ultrasonic instrumentation (MUI) is to eliminate pathogenic bacteria and remove biofilm and calculus deposits while preserving tooth structure. The approach used to achieve this goal is inherently different based on the design of the instrument, sequence of use, and the technique utilized by the clinician. This course examines the staged approach of MUI. Clinicians will learn how to effectively maximize ultrasonic instrumentation through technique and tip selection in order to minimize hand instrumentation and create an environment that encourages tissue health through the staged approach of MUI. Visual imagery and hands-on demonstrations will be provided. A review of ultrasonic inserts and hand instruments with sharp-free technology will be applied to help attendees create periodontal debridement setups that require fewer instruments.

Vaping | 2 CE
What the JUUL? Vaping, e-cigarettes, and harmful new trends

Lancette VanGuilder, BS, RDH

OBJECTIVES:

- Explore vaping/smoking trends and products
- Identify potential health risks associated with vaping devices
- Discuss the role of the health-care provider

What do you know about vaping, e-cigarettes, and harmful new trends? These devices are sleek, easy to use, and all the rage among teens, young adults, and those seeking to quit traditional cigarettes. But what is the impact on oral health? Let's explore the current vape culture and address specific health concerns and the role of the health-care provider.

8:00 A.M. – 10:00 A.M.
GENERAL SESSION

Clinical Dental Hygiene | 2 CE
Periodontal Medicine and the Expanding Role of the Dental Hygienist: Peek into the future of advanced clinical dental hygiene with an in-depth demonstration of holistic periodontal therapy

Judy Carroll, RDH

OBJECTIVES:

- Learn innovative techniques with periodontal endoscopy, piezo root instrumentation, host-modulated therapy, regenerative proteins, and integrative care using a multidisciplinary approach
- Understand pathogenesis through hidden risk factors
- Learn numerous practical applications that strengthen periodontal therapy programs while increasing production, patient satisfaction, and professional growth
- Redefine the dental hygiene scope of practice by exploring a more significant role in cotherapy

This unique course will demonstrate the unseen potential of the clinical dental hygienist to restore periodontal and systemic health by applying very specific methodologies and strategies. Witness a removal of preconceived clinical limitations of the dental hygiene profession with a thorough demonstration of well-documented case studies utilizing a holistic and integrative approach. Valuable handouts will be provided and thoroughly reviewed, providing definitive tools and knowledge for immediate implementation. Attendees will leave this course renewed and excited by their potential to create significant change within their practice and long-term positive clinical outcomes for their patients.

CONFERENCE DETAILS

THURSDAY, JULY 16, 2020 | DAY 1

8:00 A.M. - 10:00 A.M.
WORKSHOP

Implants | 2CE | \$20
Home-Care Reimagined: Biofilm Focus the New Frontier

Susan Wingrove, BS, RDH

OBJECTIVES:

- Review of the new research on bacteria, plaque, biofilm, PH, and Fluoride as it relates to home-care recommendations for tooth- and implant-borne restorations.
- Experience new ways to connect with patients through home-care recommendation and educate on biofilm elimination for overall health.
- Leave with a clear understanding of safe, effective home-care products with research-based ingredients, Fluorides and pH factors for biofilm focus care.

Commercially Supported by:

New research on biofilm as a major risk factor and link to oral systemic disease means new home-care recommendations to reflect this focus. Elevate your practice and make a lasting impact on your patient's overall health. Learn and practice new techniques, products that address biofilm for natural teeth, restorations, and implant patients.

THURSDAY, JULY 16, 2020 | DAY 1 (CONT.)

10:30 A.M. – 12:30 P.M.
GENERAL SESSION

Oncology | 2 CE

Surviving Oral and Oropharyngeal Cancer: Grasping more than the tongue

Kris Potts, BS, RDH, FAADH; Susan Cotten, BSDH, RDH, OMT

OBJECTIVES:

- Recognize the importance of the IO/EO head and neck/oral/oropharyngeal examination and risk assessment before and after cancer
- Understand what a head-and-neck/oral/oropharyngeal cancer patient and survivor experiences beyond xerostomia, mucositis, and caries
- Identify the need for differences in treatment of survivors
- Apply ways to create a collaborative relationship with the oncology team
- Formulate a current list of useful products for the patient

Commercially Supported by:

Radiation and chemotherapy will most likely have long-term oral and systemic complications. Early detection of cancer can lessen these effects. In this course, Susan and Kris will present a deeper view of patients' experiences with head-and-neck/oral/oropharyngeal cancer with a panel of survivors who have different etiologies and stories to share. The panel will share what their life is like post cancer, the struggles and changes to everyday living, and ongoing medical issues with which they struggle. Susan and Kris will discuss the importance of a thorough head-and-neck/oral/oropharyngeal cancer screening and risk assessment. They will explain how screening, assessment, and hygiene treatment may vary with these patients post cancer, and describe the side effects with which we may not be familiar. They will discuss the value of referrals and building a collaborative relationship with the oncology team, and they will review currently available products for the oral side effects of treatment.

Absolutely do it! So worth the investment. The networking is incredible! Speakers were fantastic. New friendships made were such a surprise bonus!

THURSDAY, JULY 16, 2020 | DAY 1

10:30 A.M. – 12:30 P.M.
GENERAL SESSION

Periodontal Disease | 2 CE
The Threat of Periodontal Disease in Pregnancy

Casey Hein, MBA, BSDH, RDH

OBJECTIVES:

- Describe evidence of a relationship between periodontal disease and adverse pregnancy outcomes
- By using salivary diagnostics, identify women who may be at risk for an adverse pregnancy outcome
- Communicate concerns to attending physicians
- Express patient-appropriate messages to educate women of childbearing age about the importance of oral health and the potential impact of periodontal disease on pregnancy

It is well recognized that infection and inflammation are associated with a significant proportion of adverse pregnancy outcomes, and one of the most common sources of infection and inflammation is periodontitis. It's been estimated that periodontal diseases, including gingivitis, affect 75% of pregnant women. Periodontal infection has been correlated with pregnancy complications such as preterm birth, preeclampsia, gestational diabetes, and delivery of small-for-gestational-age babies. Oral health-care providers who care for women of childbearing age should be aware of the evidence that supports the possibility that periodontal infection may be a modifiable risk factor for adverse pregnancy outcomes. This case-based course empowers oral health-care providers to incorporate into everyday patient care evidence of the relationship between periodontal disease and risk for adverse pregnancy outcomes.

10:30 A.M. – 12:30 P.M.
GENERAL SESSION

Airways | 2 CE
What Goes Wrong with Mouth Breathing and How RDHs Can Help People Switch Back to Nasal Breathing

Tim Ives, MA, MEd, BSc, RDH, FHEA

OBJECTIVES:

- Understand physiologic differences between nasal breathing and mouth breathing.
- List the signs and symptoms of mouth breathing.
- Recognize oral and facial changes associated with mouth breathing.
- Describe the link between mouth breathing and ADHD.
- Make the connection between mouth breathing, sleep, and human growth hormone.
- Understand the connection between mouth breathing and airway.

Humans are designed to be nose breathers, but somewhere along the way, nose breathing can change to mouth breathing and reduced oxygen absorption. Adequate oxygen levels lead to regenerative sleep and the release of human growth hormone. Mouth breathing leads to lower oxygen absorption levels, poor sleep, and misdiagnosis of children with attention deficit hyperactivity disorder (ADHD). Normal nasal breathing involves the tongue being up, teeth apart, and lips together. In children, the tongue up during rest and swallowing provides the necessary stimulus for adequate palatal development. The tongue position associated with mouth breathing leads to compromised jaw development and a restricted airway. Mouth breathing is a predictor of sleep apnea, long face syndrome, and other developmental and sleep-related problems.

Dental Hygiene Products | 2 CE
New Products to Inspire Patient Care!

Tricia Osuna, BSDH, RDH, FAADH

OBJECTIVES:

- Recognize improvements in products used by dental professionals
- Compare new materials and products for various aspects of dentistry
- Evaluate options in appropriate delivery of treatments
- Communicate effectively to patients and assist in the business of the dental practice
- Recognize and evaluate changes to implement in the practice

This creative concept in education offers attendees an opportunity to hear directly from manufacturers as they present their newest products with education. Company representatives speak for 10 minutes presenting education—not pricing or competitive information—on their products. The pace is fast and the information extremely valuable while respecting your time. This is a creative and thought-provoking learning experience! Please note that this is not a repeated course.

*This course is commercially supported.

10:30 A.M. – 12:30 P.M.
WORKSHOP

Ergonomics | 2CE | \$20
Joy and Karma of a Long Dental Hygiene Career

Tami Wanless, MEd, RDH

OBJECTIVES:

This course will focus on the interrelationship between cumulative trauma disorders and instrumentation techniques. A variety of hands-on activities utilizing a wide array of dental instruments on typodonts will give participants the opportunity to discover the joy of implementing new approaches to help reach peak performance with minimal stress and strain. Emphasis will focus on adapting your technique for optimal health. This workshop will provide practical principles for enhancing dexterity, preserving strength and increasing confidence when confronting ergonomic challenges. Exercises and best practices will be introduced to help extend the life of your career. Discover the joy and karma of implementing new advances.

Lasers | 2CE | \$20
Light It Up

Janet Press, RDH

OBJECTIVES:

- Discover the difference in laser capability between Doctor “Hot” Laser Settings vs. Dental Hygiene “Warm” Laser Settings while using a diode laser in the class.
- Work with the variables of laser energy protocols as they apply to the treatment of Gingivitis, and the Stages of Periodontitis.
- Experience the specifics of initiated and bare fiber tip applications for treating the periodontal infections.

Commercially Supported by:

This hands-on live Laser workshop is designed to create confidence and clinical understanding in the delivery of periodontal treatment protocols by using a Diode Laser. Working with simulation exercises you will learn the specifics of laser fiber optic delivery, and discover the delicate nature of using a laser device.

1:30 P.M. – 2:30 P.M.
MINI SESSION

The Business of Dental Hygiene | 1 CE
Rethinking Mobile Dentistry for the Dental Hygienist: How mobile dentistry can reignite your career!

Melissa Turner, BASDH, RDHEP, EFDA

OBJECTIVES:

- Identify the ways in which dental hygienists can provide mobile dentistry in their states
- Describe the steps necessary to start, build, launch, and scale a nonprofit or for-profit mobile program
- Discuss the challenges that mobile clinicians have faced in the past and currently face
- Explore what it takes to initiate, build, and maintain collaborative relationships within the local community, the dental community, and with industry leaders

Dental hygienists often search for new ways to grow and advance their careers—mobile dentistry may be just the thing they are looking for! A career in mobile dentistry is exciting, rewarding, and offers the hygienist a way to be a leader and entrepreneur. It’s time for every hygienist to reimagine how they can ignite and change their current career! Attendees will learn how it is possible for a hygienist to provide mobile services in their community—whether that means collaborating with or without a dentist, owning a dental business or remaining an employee, or working solo or with a team. This course will also review what it takes to build, launch, scale, and maintain a mobile program. A heavy focus will be on how to foster relationships beyond the four fixed walls of the dental practice and into the local community. Attendees will also learn about the latest and greatest technological services and products that make modern mobile delivery efficient and fun!

1:30 P.M. – 2:30 P.M.
MINI SESSION

Implants | 1 CE
Understanding Peri-Implant Diseases: What does the evidence say?

Lisa Mayo, MHA, BSDH, RDH

OBJECTIVES:

- Develop an understanding of the evolution of implant dentistry
- Discuss treatment planning options, types of implants, and procedures
- Describe the etiology of peri-implant diseases
- Recognize the risk factors of implant-related diseases and utilize the appropriate assessment techniques to properly treat implant-restored teeth
- Examine various methods of implant debridement
- Discuss the need for structured, calibrated office philosophy on maintenance schedules and referrals

Dental implants are a widely accepted viable treatment option for missing teeth and edentulism. Worldwide, the number of implants placed annually continues to grow. As placement increases, so does the prevalence of peri-implant diseases. To effectively manage the oral health-care needs of patients with dental implants, clinicians need to know and understand the evidence for diagnosis and recognize the risk factors for peri-implant diseases. This course provides an evidence-based review of peri-implant diseases focusing on diagnosis, treatment, and strategies for prevention.

1:30 P.M. – 2:30 P.M.
MINI SESSION

Anesthesia | 1 CE
Enhancing Patient Comfort and Safety: Concomitant use of local anesthesia and nitrous oxide and oxygen analgesia during nonsurgical periodontal therapy

Laura Webb, MSHSA, RDH, FAADH

OBJECTIVES:

- Discuss the rationale and protocols for pain management during the provision of nonsurgical periodontal therapy
- Analyze the advantages of concomitant use of local anesthesia and nitrous oxide and oxygen analgesia for enhancing patient comfort and safety
- Identify circumstances that influence selection of anesthetic agents and injection techniques
- Summarize the safe procedures for administration of nitrous oxide and oxygen analgesia

This course is presented as an interactive lecture supported by PowerPoint slides. The nature of the topic requires colorful imagery that illustrates armamentarium and methods, and explicitly written content regarding concomitant use of local anesthesia and nitrous oxide and oxygen analgesia during nonsurgical periodontal therapy to enhance patient comfort and safety. Questions and comments are encouraged during and at the end of the formal presentation.

THURSDAY, JULY 16, 2020 | DAY 1

1:30 P.M. – 2:30 P.M.
MINI SESSION

Oral-Systemic Health | 1 CE

Oral Rinse Assay to Aid in the Diagnosis of Oral Squamous Cell Carcinoma Including Review of the Literature: Evidence from three independent European clinical studies

Elizabeth Franzmann, MD; Michael Donovan, MD

OBJECTIVES:

- Understand that HPV-related oropharyngeal cancer incidence rates are increasing across the world
- Review pathogenesis and clinical characteristics of HPV-related oropharyngeal cancer and traditional oral and oropharyngeal cancer
- Understand current prevention and early detection strategies for oral and oropharyngeal cancer
- Provide an update on ongoing studies investigating specific tumor markers total protein and CD44 in oral and oropharyngeal cancer early detection

Dental hygienists often search for new ways to grow and advance their careers—mobile dOral cavity and oropharyngeal squamous cell carcinoma, commonly known as mouth and throat cancer, make up the great majority of cancers in the head-and-neck region. While traditional risk factors for these cancers include tobacco, alcohol, and areca nut use, the last few decades have seen a striking increase in another major risk factor for oropharyngeal cancer, oncogenic HPV infection. Cancers caused by traditional etiologies are marked by progressive carcinogen induced mutations, leading to field cancerization and tumor progression, and generally have a worse prognosis than the HPV-related cancers. With improvements in smoking cessation in many developed countries, human papillomavirus infection is becoming the most important risk factor and is responsible for the increasing incidence of oropharyngeal cancer. Tobacco, alcohol, and areca nut use continue to be the major risk factors for oral and oropharyngeal cancers across the world and particularly in parts of Asia. Regardless of etiology, oral and oropharyngeal cancer would be treated more successfully if diagnosed at an earlier stage. The current gold standard for screening, the physical exam, has limited sensitivity and specificity. Methods for early detection and assessment of potentially malignant oral disorders include visual and tactile oral examination, the use of light-based adjuncts such as autofluorescence, and narrow-band imaging, vital staining, cytopathologic platforms, salivary based molecular/proteomic tests, and other novel emerging technologies. Soluble CD44 and total protein are proteomic markers that are associated with oral and oropharyngeal cancer and poor prognosis. The markers can be elevated very early in the disease process. Studies are ongoing to determine whether these markers aid in early detection and will be presented in this session.

It's worth every penny! You come home invigorated and ready to be better for your patients.

MEGA SESSION

Professional Development | 2 CE
Us Vs. Them!

Jeff Havens

OBJECTIVES:

- Learn to replace the complicated four-generation model with a workable dichotomy between older, more experienced workers and their younger, less-experienced counterparts
- Understand the key cultural, technological, and social changes that have conspired to create a disconnect between team members from these two generations
- Walk away with several immediately applicable strategies to address and eliminate problems caused by the disconnect mentioned above
- Inspire a healthier, more robust work ethic in your younger employees (and your older ones, too) Inspire a healthier, more robust attitude toward change in your older employees (and your younger ones, too)

Commercially Supported by:

PHILIPS

If you've listened to any other discussion about generational issues at work, then you've undoubtedly been told there are four distinct generations operating side-by-side in today's working world. You've then been told the differences between those four generations, and then you've been told (although probably not in these exact words) that you need to just deal with all these different people, because they're not going away and they're not going to change how they operate. If that advice suits you, fantastic.

However, if you've ever been frustrated by how impossible it seems to employ four different strategies to manage four distinct generations, and if you've ever felt like you're the only one who's being asked to make any changes, then Us Vs. Them is exactly what you need. Because it turns out that there really aren't four generations. In this hysterical keynote, you'll learn a simpler way of looking at your own generational picture, and you'll also learn how to understand, recognize, and resolve every generational issue facing today's workforce. That's no exaggeration; by the end of Us Vs. Them, you and your colleagues will walk away with all of the knowledge you'll need to address 100% of the generational issues you'll face for the rest of your career. Other generational presentations focus on what people want, but Us Vs. Them will tell you why everyone wants the different things they do. It's an important distinction, and it will make implementing new solutions easier than you ever thought possible.

So get ready to laugh more and learn more than you ever thought possible. Because improving your generational issues doesn't have to be boring.

It's well worth the time and money. Every RDH should attend at least once, and then they'd be hooked for life!

Teledentistry: Using technology to become a community-engaged dental program

Cindy Purdy, BS, RDH; Eden Ivie, RDH

OBJECTIVES:

- Identify disparities and patient barriers in your community and how portability can offer solutions
- Examine business models, clinical settings, and alternative services to improve patient outcomes and practice growth
- Discuss the challenges/opportunities of practicing beyond the traditional dental office
- Explore collaborative resources that are unique to your community
- Comprehend critical choices needed to implement an alternative dental program
- Share successful user cases

Envision equality in patient care while providing a profitable, convenient outreach program in your community. Disparities within dental care continue and are directly related to poverty status, education, and ethnicity. According to the latest Centers for Disease Control findings, the use of dental services has decreased to 40% among working-age adults. Only 47% of adults currently utilize dental services. New technologies and advancements in telehealth policies and dental practice acts have removed many restrictive barriers, allowing dental practitioners to help eliminate these disparities and enhance the satisfaction of their careers.

Geriatrics | 2CE

“Brushing the Ones, You Want to Keep” ... Educating the Aging Population About Their Need for Improving Oral Health Care.

William Pareletz, DMD

OBJECTIVES:

- **Suggest different techniques and products to your patient so they will be more likely to accept restorative and preventive procedures.**
- **Explain the implication of common chronic disease on geriatric oral health**
- **Describe how various improvements to current dental products can improve the patient’s oral health**

Dental statistics show today’s “senior” dental patients are a growing part of a dental practice. For some dental staffers these patients are a joy and for others a challenge.

Commercially Supported by:

“Senior patients” today and beyond have a different outlook regarding dentistry than their parents. These individuals do not believe they have to lose their teeth to the aging process. Many have the financial means to invest in their dental treatment but only if, they feel comfortable with the care and guidance from their dental team. These expectations can be challenging to any team member. The ability of the dentist and staff to navigate thru a series of medical conditions, medication therapies and personal needs can be overwhelming.

FRIDAY, JULY 17, 2020 | DAY 2 (CONT.)

10:30 A.M. – 12:30 P.M.

Clinical Dental Hygiene | 2 CE

Oral Biofilm—Advances in Treating a Worldwide Epidemic: A unique panel discussion with renowned dental therapists sharing their perspectives in treating biofilm

Faye Donald, RDH; Karen Davis, BSDH, RDH; Melissa Obrotka, BBA, RDH, ICP; Penny Hatzimanolakis, MSc, BDS, RDH; Tabitha Accret, BA, RDH

OBJECTIVES:

- Define and distinguish the benefits of guided biofilm therapy (GBT) and support the clinician’s ability to communicate its effectiveness and ease of implementation
- Appraise the potential of piezo-ceramic ultrasonic instruments and erythritol-based powder to alter therapy outcomes delivered both supra- and subgingival
- Recognize dental hygienists and therapists worldwide as integral components of the health-care team positioned to diminish the effects of undertreated chronic inflammation with GBT

Have you noticed that there is an overwhelming theme in almost every health journal related to effects of chronic inflammation? Our profession and the public are made aware of the association of toxic oral pathogens and their effect on total health and wellness, and this epidemic has no borders. Dental clinicians worldwide still provide preventive and therapeutic treatment, yet inflammatory diseases are still unmanageable. In fact, the AAP declared that periodontal disease is at an all-time high, and yet it is still underdiagnosed and undertreated by a staggering fifty percent. This unique program will bring a global panel of experts focusing their efforts on educating and implementing guided biofilm therapy (GBT), a program developed to increase diagnosis for enhanced chairside therapy and to promote effective biofilm management, resulting in patient comfort and retention in long-term health and wellness.

Commercially Supported by:

“Every RDH needs to come because it’s beneficial to their profession and it’s an opportunity for them to invest in their careers.”

FRIDAY, JULY 17, 2020 | DAY 2

10:30 A.M. – 12:30 P.M.
WORKSHOP

Implants | 2CE | \$20

Getting to the Root of Implant Maintenance: A 21st Century Approach to Implant care

Edie Gibson, MS, RDH

OBJECTIVES:

- Identify the importance of assessing dental implants and recognize risk factors for long term implant success.
- Utilize evidence-based research to implement an integral implant assessment and current maintenance protocol.
- Implement clinical treatment plan including techniques, technology and instruments to remove biofilm and hard deposits
- Learn how to Empower patients to care for their implants at home and understand that maintenance effects the success rate of their implants.

Commercially Supported by:

Implant maintenance is the fastest growing category in dentistry with more and more patients appearing with dental implants each year. There is a need, now, more than ever, for offices to implement implant maintenance protocols and solutions to effectively and safely treat this growing implant patient population. This hands-on course will help take the mystery out of implant maintenance by describing procedures, instrumentation and techniques to for optimal care for your implant patients. Additionally, you will learn assessment and treatment protocols for peri-implant disease and how to create a customized home care protocol to improve patient engagement.

10:30 A.M. – 12:30 P.M.
WORKSHOP

Implants | 2 CE | \$20

Hygiene and Maintenance for Fixed Full Arch Implant Restorations

Alison Stahl, BS, RDH; Anna Pankow-Wilson, RDH

OBJECTIVES:

- Understand a historical overview of the edentulous treatment concept and the radiographic
- Review occlusion and the role it plays in the maintenance process of the full arch prosthesis
- Evaluate implant stability and mobility circumstances
- Become familiar with a home care maintenance protocol
- Identify long term patient maintenance requirement options

Commercially Supported by:

As the number of patients opting for dental implants is increasing, it becomes essential to know the differences between natural teeth and implant care and accept the challenges of maintaining these restorations. A comprehensive maintenance protocol should be followed to ensure the longevity of the implants with a complete-arch prosthesis. This program will discuss maintenance guidelines to establish a protocol for such restorations with a hands-on exercise. This course welcomes Hygienists wishing to expand their knowledge with full arch prosthesis maintenance within the dental practice.

American Academy of Dental Hygiene Annual Business Meeting

Supported by:

Please join us as our guest! The mission of the American Academy of Dental Hygiene (AADH) is to foster the continuing pursuit of education and research in the art and science of dental hygiene, provide formal recognition of excellence in the practice of dental hygiene, and recognize distinguished community service in the effort to foster improved oral health. Our vision is to foster fellowship, mentorship, and leadership. AADH serves the dental hygiene profession as a course-approval entity.

All Attendees Welcome

1:30 P.M. – 2:30 P.M.
MINI SESSION

Special Needs | 1 CE
Special Care for Special Needs: Understanding and treating broad challenges in the dental office

Theresa McCarter, BSDH, RDH

OBJECTIVES:

- Discover the difference between a disease, disorder, condition, and syndrome
- Understand how to create a positive dental experience for special-needs patients
- Recognize techniques that work in the dental office for the patient and the clinician
- Identify specific conditions that affect the oral health of special-needs patients
- Learn how to identify, modify, and implement a dental care plan for a special-needs patient

A special need is defined as “any various difficulty, which can be physical, emotional, behavioral, or learning.” Individuals with special needs require specialized services and/ or accommodations in their daily lives. These difficulties can be a result of a disease, disorder, condition, or syndrome. Do you know the difference? There are 18 million children in the United States with special health needs. There are approximately 53 million adults who live with a disability in the United States. It is important to understand what constitutes a special need and to modify and implement a dental care visit to meet the individual’s specific needs. In dentistry, we must be educated on every special need because we have a responsibility to provide exceptional care to all individuals. Learning current techniques in providing care to special needs patients can improve their dental and overall health and make the dental visit a positive experience.

FRIDAY, JULY 17, 2020 | DAY 2

1:30 P.M. – 2:30 P.M.
MINI SESSION

Insurance/Coding | 1 CE

Protecting Your Income, Lifestyle, and Family: Understanding disability insurance for the dental professional

Susan Cotten, BSDH, RDH, OMT

OBJECTIVES:

- Describe disability insurance basics
- Identify different riders in disability insurance and discuss the importance to the dental professional
- Explain the differences in individual disability insurance vs. employer-sponsored insurance

According to the Council for Disability Awareness, more than one in four 20-year-olds can expect to be out of work for at least a year because of a disabling condition before they reach retirement. The most common reason for long-term disability claims is musculoskeletal disorders (MSDs). MSDs are the single largest category of workplace injuries and responsible for approximately 30% of worker's compensation costs. An unforeseen event, illness, injury, or MSD can prohibit the dental professional from physically being able to work or continue with their full schedule. Dental professionals have an investment in their family, education, and career. A proactive approach helps protect these investments. Join Susan to discuss this important topic.

1:30 P.M. – 2:30 P.M.
MINI SESSION

Periodontal Disease | 1 CE

Periodontal Disease and Dementia/Alzheimer's Disease: The truth about their relationships

Claire Jeong, MS, RDH

OBJECTIVES:

- Understand how inflammatory mediators found in periodontitis can affect the brain
- Understand how pathogens found in periodontitis can affect the brain
- Explain to the patient concerns related to periodontitis and its potential effect on the brain
- Understand the reason the conclusion is not evident yet
- Expand knowledge on the topic of oral-systemic health

Five million people in the United States are affected by dementia, and this number is rising every year. While the science behind this mental condition is still developing, many articles suggest a link between dementia and periodontal disease. But how are the two diseases related? You may have seen posts online such as "Take care of your oral health and prevent dementia" or "Chronic periodontitis leads to brain inflammation, fewer brain cells, and more amyloid-beta (plaque found in tissues in patients with Alzheimer's disease)." Those simplified interpretations are dangerous. We know about the oral-systemic link, and studies have found associations between periodontitis and dementia. However, the relationship between the two diseases is much more complicated. We have to use an evidence-based approach and carefully interpret the findings.

FRIDAY, JULY 17, 2020 | DAY 2 (CONT.)

1:30 P.M. – 2:30 P.M.
MINI SESSION

Xerostomia | 1 CE

Become the Hero of Your Patients and Solve the Dry-Mouth Mystery

Shannon Nanne, RDH

OBJECTIVES:

- List the oral and nonoral symptoms reported by patients suffering from xerostomia
- Discuss the causes of xerostomia and understand the components and functions of saliva
- Explain the clinical signs of salivary gland hypofunction
- Discuss management options for educating patients and improving their quality of life
- Identify successful treatment options and products available

We know that xerostomia is not a disease, but it is often not discussed or it is masked by dry-mouth products. However, xerostomia is a serious condition that is annoying and uncomfortable and usually caused by a disease or underlying condition. It affects your patients' quality of life while speaking, eating, or even trying to sleep. Hyposalivation can damage the hard and soft tissues of the mouth while presenting a clinical challenge in the operator. Twenty-five percent of your patients suffer from this terrible affliction, and age is not a cause of dry mouth. Xerostomia is more common in the older adult population but is not necessarily an inevitable part of aging. This course will turn you into a dry-mouth superhero! You will be able to teach patients reasons why they suffer from dry mouth, and understand intraoral problems associated with it and management options available to make your patients more comfortable managing their symptoms

3:00 P.M. – 5:00 P.M.
MEGA SESSION

The Business of Dental Hygiene | 2CE

Hygienist Proud, Heart to Heart Conversations

Andrea Johnson, MS, RDH; Rafael Rondon, RDH; Machell Hudson, RDH, FAAOSH; Sonya Dunbar, RDH, MHA

OBJECTIVES:

- Addressing Oral Health Needs for the Elderly – presented by Sonya Dunbar- 70% of residents on long term care facilities have been found to have unacceptable levels of oral hygiene exhibiting signs of periodontal disease caries and facial pain. Her presentation will discuss the oral health status of the elderly and the relationship this has on oral complications and systemic health.
- Don't Let the Health of Your Mouth Break Your Heart – presented by Machell Hudson – In the United States heart attack is the number one cause of death, while stroke is the number one most debilitating. A lesser known fact is the important correlation shared between oral health and heart health. By understanding the role oral disease plays in the causation of heart attack and stroke, dental professionals are better equipped to promote heart health and ultimately save lives.
- How Vital are your Vital Signs in Dentistry – Rafael Rondon – Empower the hygienist to co-diagnose and treat patients in a manner consistent with their training and experience. Increase awareness of the Dental Hygiene profession by creating value in the services we offer to our patients and in our profession. Several screenings and assessments will be discussed and patient acceptance and how to set the stage.

This program will provide an uplifting view from hygienist and their passions to make the world better. Each speaker will share their passion for being the best hygienist that can be and how finding their purpose changed their perspective.

8:00 A.M. – 10:00 A.M.
GENERAL SESSION

Pharmacology | 2 CE

It's (Medically) Complicated!—Essential pharmacology and oral-systemic health guidelines for the dental hygienist treating medically complex dental patients

Thomas Viola, RPh, CCP

OBJECTIVES:

- Identify the prescription medications most frequently encountered on a patient's medical history and discuss their oral-systemic health implications
- Discuss the nonprescription medications most often used by dental patients and explain their oral-systemic health implications
- Identify the most popular dietary supplements and discuss their oral-systemic health considerations
- Identify the most common substances of abuse and their oral-systemic health considerations

Commercially Supported by:

Dental hygienists must frequently draw upon their knowledge of pharmacology for optimal care of today's medically complex dental patients. However, armed with relatively brief exposure to such a vast subject during formal education and faced with ever-changing disease state management protocols, many dental hygienists simply cannot keep up with the latest in oral-systemic health guidelines. This program will provide an overview of the oral-systemic health implications of the prescription medications, nonprescription medications, herbal products, nutritional supplements, and substances of abuse most frequently used by patients. Special emphasis will be given to delivering this essential information in a format that makes it practical and useful in the daily practice of the dental hygienist.

SATURDAY, JULY 18, 2020 | DAY 3 (CONT.)

8:00 A.M. – 10:00 A.M.
GENERAL SESSION

Oral-Systemic Health | 2 CE
New Findings and Emerging Trends in the Oral-Systemic Link

Carol Jahn, MS, RDH

OBJECTIVES:

- Evaluate emerging data on the link between periodontal disease and risk for various types of cancer
- Discuss the role of periodontitis, inflammation, bleeding, and tooth loss on systemic health
- Understand the current scientific perspective on the association between heart disease and oral health
- Explain the link between other chronic conditions such as Alzheimer's disease, chronic liver disease, kidney disease, and oral health

Does having periodontal disease increase the risk of cardiovascular disease, adverse pregnancy outcomes, cancer, or Alzheimer's disease? Multiple studies have found periodontitis is associated with cardiovascular disease. Recent findings in the Journal of the National Cancer Institute found that severe periodontal disease was associated with a 24% increased risk for cancer. This course will review current evidence on the link between oral and systemic health, and provide talking points for communicating this information with patients.

SATURDAY, JULY 18, 2020 | DAY 3

8:00 A.M. – 10:00 A.M.
GENERAL SESSION

Communication and Patient Compliance | 2 CE
The Alzheimer's Experience

Angie Stone, BS, RDH

OBJECTIVES:

- Recognize when activities of daily living are changing for patients, what that means for dental health and how to prepare patients to keep their teeth
- Understand modifications that can be made to the dental office to assist those in the early to middle stages of Alzheimer's receive dental care more effectively
- Witness the struggles those with Alzheimer's experience
- Learn how to develop a program to support dental health through the entire spectrum of Alzheimer's disease

Currently there are 5.8 million suffering from Alzheimer's in the United States. This number is predicted to rise to 14 million by 2050. Couple with that the fact it is rare those with middle- to late-stage Alzheimer's receive dental care of any kind, and it is a recipe for disaster. In fact, there is a disaster today within the halls and rooms of locked dementia units across the US, and the dental profession is oblivious. This course will take the attendees on an Alzheimer's journey. It is imperative the dental team understands how to care for those with cognitive issues and realizes what it is like to be affected by this disease. Recognizing the signs that things are changing for patients is key. Shoring up dental health before the disease advances is necessary. Decisions on how oral health will be maintained when the patient is no longer able to care for their own mouth need to be made early and need to be implemented quickly when the time is right. Few receive this kind of care..

8:00 A.M. – 10:00 A.M.
GENERAL SESSION

Dental Hygiene Products | 2 CE
#Trends Impacting Dental Hygiene Practice and the Profession

Kristy Menage Bernie, MS, RDH, RYT

OBJECTIVES:

- Understand and appreciate the impact of social media and direct-to-consumer marketing on patients' dental IQ and use of products/protocols
- Develop strategies to educate patients about trending topics and associated research or lack thereof
- Implement an action plan to monitor trending topics and be prepared to provide evidence-based responses

Commercially Supported by:

There is no doubt that the evolution and utilization of social media and electronic news media outlets have had a profound impact on the practice of dental hygiene as consumers are being "educated" through these sources. From direct-to-consumer orthodontics to magic potions to cure periodontal disease to new technologies for daily care, patients are bombarded with dental "health" information that may in fact be harmful. This high-energy session will overview the ever-changing landscape and explore the top trending topics that impact clinical practice. (Is there sufficient research to support daily use of dental floss?) A review of research related to innovations and protocols will be included, with attendees directing the session content live while building resources to maximize patient care and professional growth.e..

SATURDAY, JULY 18, 2020 | DAY 3 (CONT.)

10:30 A.M. – 12:30 P.M.
GENERAL SESSION

Cannabis | 2 CE

Dazed and Confused: Unmasking the cannabis and vaping explosion

Edie Gibson, MS, RDH

OBJECTIVES:

- Understand the oral and systemic effects of electronic nicotine-delivery systems (ENDS) and cannabis
- Distinguish myth vs. reality of the medicinal aspect of cannabis and “safety” of ENDS (e-Cigs/vaping)
- Identify the current trends in vaping and cannabis use
- Appreciate the difference between THC/THCA, CBD/CBN, and other cannabinoids

According to a study conducted by the NIH, nearly 40% of 12th graders and 11% of 8th graders polled reported vaping nicotine on a regular basis. That translates to an additional 1.3 million adolescents who started vaping nicotine in 2018. The same study reported 13% of 12th graders vaped marijuana (THC) as well. With vaping now an epidemic, combined with the legalization of cannabis in many states, a shifting paradigm of drug use is evolving. This shift is wreaking havoc on the teen brain and body! The ability to communicate these issues, as well as the negative oral health ramifications, to our patients is critical as health-care providers. This program will uncover the mysteries of e-Cigs (JUULing), recreational and medical cannabis, and expose the reality hidden by the “smoke and mirrors.”

10:30 A.M. – 12:30 P.M.
GENERAL SESSION

Oral-Systemic Health | 2 CE

Leaky Gums and Leaky Gut: A missing link

Karen Thomas, MS, RDH, CNS, LN, HNFM, FDN-P, CHHC

OBJECTIVES:

- Identify imbalances in the oral microbiome
- Recognize GI issues as an indicator of a much larger picture of health or lack thereof
- Understand how to recognize potential signs of a deeper health concern
- Learn the science behind the oral-systemic link between the gums and the gut
- Evaluate options for communicating the science of microbiome to patients and its importance

Dental professionals are well educated regarding the impact the oral microbiome has on the oral cavity. This area of knowledge is forever changing, and we now know oral bacteria is not contained to the mouth. Hearts, lungs, and brains have all been shown to be affected by bacteria such as Klebsiella pneumoniae, Fusobacterium species, and H. pylori. The oral microbiome can be a confusing and scary place. An area that is underestimated and not widely understood, especially in dentistry, is the influence of the oral microbiome on the gut, and vice versa. Educating patients about the link between symptoms within the body and gut microbiome is powerful. While dental hygienists are tasked with sharing knowledge with patients, they are also an integral link between dentistry and medicine. This course will take attendees on a journey from the gums to the gut and beyond, all while discovering associations to common autoimmune diseases and chronic health conditions.

SATURDAY, JULY 18, 2020 | DAY 3

10:30 A.M. – 12:30 P.M.
GENERAL SESSION

Preventive Dentistry | 2 CE

Prevention vs. Prosecution: How this life could have been saved

Shannon Nanne, RDH

OBJECTIVES:

- Know how to proactively screen for oral cancers and how to conduct a proper oral cancer exam
- Understand tests for oral cancer screening
- Utilize adjunctive devices for oral cancer screenings
- List causes of oral cancer
- Discuss common sites for oral cancer
- Inform patients on oral side effects of chemotherapy
- Explain the clinical signs of salivary gland hypofunction
- Identify successful treatment options and products available to improve quality of life

This educational event will highlight oral melanoma case presentations, one featured at the International Symposium in Dental Hygiene in Switzerland in 2016. After completion, you will be comfortable in recognizing irregular spots intraorally and extraorally. Many people have abnormal sores in their mouths, with the great majority being noncancerous, making our screening techniques even more important. Any person with a history of tobacco and alcohol use or prior head-and-neck malignancy has a significant risk of developing an oral or head-and-neck cancer. You will be able to teach patients reasons why they suffer from radiation-induced xerostomia, intraoral problems associated with it, and management options available to make your patients more comfortable managing their symptoms. The goal with oral and skin cancer screening is to identify cancer early, when there is a greater chance for a cure.

10:30 A.M. – 12:30 P.M.
GENERAL SESSION

Communication and Patient Compliance | 2 CE

Human Trafficking: Would you recognize your patient as a victim?

Nancy W. Burkhart, EdD, RDH, AFAAOM

OBJECTIVES:

- Identify the verbal and physical cues of a trafficking victim or perpetrator
- List the key professions involved in labor and sex trafficking
- Understand the people who become targets for perpetrators
- Become knowledgeable in ways that a health professional can assist a victim
- Learn the key ways to obtain help for victims

Human trafficking involves both labor trafficking and sex trafficking. The issue of human trafficking is worldwide without boundaries. The numbers of victims have continued to increase, and this issue knows no socioeconomic denominator with regard to perpetrators or clients involved in trafficking. The dental community and the medical community are in a prime position to identify trafficking victims and are in a position to act on their behalf in obtaining assistance for them. Most trafficking victims are seen as patients for medical or dental care during their captivity because of poor health or injury. This course will provide some clues that may indicate that your patient may be in a trafficking situation. The course will provide suggestions in assisting and identifying the victim and possibly the perpetrator involved in trafficking the victim. National and international associations are discussed that are instrumental in obtaining help for victims.

Do Your Patients Have the Guts to Enjoy Oral Health?

Uche Odiatu, DMD, BA, NSCA

OBJECTIVES:

- Learn the new science of the human microbiome
- Discover the powerful impact of gut flora on immunity, metabolism, and digestion
- Understand the role of diet in supporting healthy gut flora
- Get the latest science on the negative impact of stress, poor sleep, and jet lag on the health of gut flora
- Learn top three foods your gut flora love
- Know the difference between prebiotics and probiotics
- Receive chairside strategies so you can share this information with patients effortlessly

Commercially Supported by:

Do your patients have the guts to douse the flames of oral inflammation? Our patients' gut flora make very powerful anti-inflammatory agents when fed key nutrients. Learn what impacts gut integrity: antibiotics, jet lag, fast food, artificial sweeteners, and what we dental professionals can do to help! The latest science from the National Institutes of Health shows the microbiome impacts overall health as much as our genes. Dental industry people are the key professionals to ensure optimum functioning of the masticatory system. Attend this insightful session and enjoy a novel path to lower your patients' inflammatory burden.

AMBASSADOR PROGRAM

Sign up to be a **RDH • UnderOneRoof** AMBASSADOR

Do you know dental hygienists that would benefit from attending

RDH Under One Roof?

Do you tell everyone you know about the event?

Then it's time you are rewarded for being an RDH Under One Roof Ambassador!

1. Send an email to rdh@american-tradeshow.com requesting to become a 2020 Ambassador. Registration will send you a unique code for you to send to your friends and colleagues.
2. At least two first-timer attendees must register (and pay) as full conference registrants using your unique promo code.
3. Get rewarded and win prizes!

2019 #RDHUOR Top Ambassador,
Sandra Salazar-Mendoza, BS, RDH

HYGIENE TOOLS FOR THE INFORMED DENTAL HYGIENIST

MAGAZINES

RDH

RDH is for dental hygienists who are committed to ongoing professional growth. Topics range from clinical and practice management to continuing education.

Request a new subscription or renew your existing subscription to *RDH* by visiting rdhmag.com.

WEBSITES

RDHmag.com

The official *RDH* magazine website, rdhmag.com, features up-to-date information for dental hygienists.

DentalAcademyofCE.com offers awesome continuing education opportunities—often at discounted prices...or even free! There's no better value in CE—find out why today!

Dentistry iQ

This website features all of the latest news in the dental industry and informative resources for every member of the dental office.

Visit our websites for instant access to:

- Breaking industry updates
- New product announcements
- Contests and free samples
- Feature articles
- CE credit opportunities

E-NEWSLETTERS

RDH eVillage.

RDH eVillage is a weekly opt-in e-newsletter that is prepared for dental hygiene professionals who are looking for hard-hitting current information. Each issue contains clinical tips, new products, industry news, answers to clinical questions, practical up-to-date articles, surveys, continuing education, and more.

RDH Graduate

RDH Graduate is an e-newsletter for hygiene students and new hygienists. Dental hygiene's newest practitioners face the challenge of keeping up with the quickly evolving dental profession. *RDH Graduate* provides timely information for dental hygiene students and recent graduates to help them stay abreast of changes in treatment protocols, technology, and career choices.

Dental Assisting Digest (DAD) is the monthly newsletter designed specifically for dental assistants, whose contributions to dental practices keep things running smoothly. This newsletter shares the latest clinical tips and techniques, and provides information designed to empower assistants at every stage of their careers!

Dental Office Manager Digest Dental office managers juggle a myriad of responsibilities every day. These include handling the phones, greeting patients, submitting insurance, knowing correct dental codes, managing the staff, and so much more. *Dental Office Manager Digest* addresses these issues and more each month. The articles are written by people who speak from experience, and who can help make the job a little bit easier.

PLANNING YOUR TRIP TO COLORADO

200 Stores. 250 Restaurants.

ALL JUST MINUTES FROM THE GAYLORD ROCKIES

RDH Under One Roof welcomes you to Aurora, Colorado—

The Gateway to the Rockies! Aurora is home to several unique dining, shopping, and entertainment options. Come and discover the outdoor adventures that Colorado has to offer. The adventurous and vibrant town of Aurora, located just outside of Denver, is sure to delight you.

Aurora offers more than 250 mouthwatering world-class cuisine dining spots that make for an ultimate dining experience. From the barbeque, to ethnic eateries representing six continents, the restaurants offer dishes that can't be found anywhere else and that should appeal to any palate. For trademark craft beer and well-crafted cocktails, visit the local breweries, wineries, or a cidery.

There is a diverse blend of more than 200 retailers. Whether you prefer mega-malls with well-known stores, discount outlets, or charming boutiques, the Aurora shopping scene has something for everyone. Best of all, the city is nestled 30 minutes from downtown Denver, which gives you the opportunity to explore even more shopping venues.

Aurora is the perfect destination for the whole family. Between the 113 parks, 98 miles of trails, and over 8,000 acres of wide-open space, there is plenty to explore. Discover paddle boarding, hiking, biking, swimming, wildlife viewing, and more, all within the city limits.

Enjoy some summer family fun at the Elitch Gardens, Denver Zoo, or Colorado Rapids, or go horseback riding or visit one of the water parks. With boundary-pushing productions or fun musicals for the kids to enjoy, you can discover live classical music, theatre productions, pop-up events, live dancing, public art exhibits, and gallery showings. People can tour public art during the day and stop by a local brewery for some craft beer and live music in the evening.

We can't wait to see you at RDH Under One Roof 2020!

TIPS TO GET YOUR DENTIST TO PAY

Your attendance is worth the investment!

Three steps to gain your dentist's buy-in:

1. DO YOUR RESEARCH

Identify conference sessions that satisfy your professional goals. Use our Interactive Floor Plan to locate exhibitors that address specific needs within your office. Prepare a list of benefits that you can achieve by attending **RDH Under One Roof**.

2. SHOW HOW EVERYONE BENEFITS

Share your event goals with your office and demonstrate how your participation in **RDH Under One Roof** will help your team achieve their goals. Offer to give a presentation upon returning from **RDH Under One Roof** to share any new ideas or products that you learned about during the event.

3. WRITE A PROPOSAL

Write out your ideas and submit them to your dentist with your intended schedule of conference track subjects and the list of companies with which you hope to network. Include the cost of airfare and lodging and make sure your manager knows that a Full Conference Registration includes two days of lunch!

Visit <https://www.rdhunderoneroof.com/rdhuor2020/tips> to download and customize the Letter to Your Supervisor to get started.
