WHY ATTEND?

Now in its 23rd year, **RDH Under One Roof** is a conference and exhibition exclusively for dental hygienists. RDH Under One Roof is THE event for the dental hygiene profession.

**TAKE IT FROM THESE HYGIENISTS,
THIS IS AN EVENT YOU DON'T WANT TO MISS!**

**It's the most fun you'll
have at a conference!**

You learn and become energized
about your profession.

Best way I have ever
obtained all the CE credits
in one conference.

**It's a great conference
to experience!** The exhibit hall is
filled with products geared towards our
profession and filled with fellow RDHs!

So much fun hanging out with
so many other hygienists.
You learn so much!!!!

2023 CONFERENCE HIGHLIGHTS

 Diversified clinical general session topics, including lasers, medical emergency, oral systemic health, ergonomics, special needs, and so much more!

 Hands-on workshops offering advanced or new techniques.

EXHIBIT HALL HOURS

Thursday, July 20, 2023	5:30 p.m. – 7:30 p.m.
Friday, July 21, 2023	9:30 a.m. – 3:00 p.m. & 5:30 p.m. – 7:30 p.m.
Saturday, July 22, 2023	8:00 a.m. – 10:00 a.m. & 12:00 p.m. – 3:00 p.m.

REGISTRATION

What is included in a full conference registration?

-  All general sessions, including the mega, keynote, and wrap-up sessions
-  Up to 20 CE credits if you attend only general sessions all three days
-  Access to the exhibit hall floor to visit and network with 125+ exhibitors
-  Lunch on the exhibit hall floor Friday and Saturday
-  Networking reception on Thursday evening* and a reception on the exhibit hall floor Thursday and Friday evening

See page 47 for additional details.

Please note: Workshops are not included in a full conference registration. Additional registration is required to attend workshops.

GENERAL EVENT

How do I get my dentist to help pay my tuition?

-  See page 46 for tips on how to justify your trip to your dentist.

What meals are included?

-  Full conference attendees receive lunch on Friday and Saturday and drinks and snacks at each of the networking receptions on the exhibit hall floor.

TRAVEL TIPS

How do I book my hotel room?

See page 45 for details.

How do I find a roommate?

-  Join our private Facebook group (RDH Under One Roof Official) to become acquainted with fellow attendees.

What do I wear? How should I pack?

-  Typical attire for attendees ranges from business casual to casual. It will be hot outside, but the session rooms will be set for 72 degrees. This can feel chilly to some, so bring a sweater or light jacket to wear during the day.

What activities does Nashville offer?

-  A lot! See page 44 for a list of activities.

EXHIBIT HALL

Will I have time to visit the exhibit hall?

-  Yes, and there is so much to see! Visit the exhibit hall during lunch, in between sessions, and during the evening receptions.
-  See pages 39-41 for a full diagram of the exhibit hall and a list of exhibiting companies.

CONFERENCE

What is a general session?

- General sessions are large group courses open to all registered conference attendees. Seating is first come, first served, so come early to get a good seat. No additional registration is needed to attend any of the general sessions.

What is a workshop?

- Workshops are small group courses with hands-on elements. Workshops are ticketed and required additional registration for a nominal fee. If you are more than 15 minutes late to a workshop, you will not be allowed in.

What if I am late to a course?

- In an effort to keep the conference program on schedule, courses start promptly. Be early!
- If you are late to a general session, try to enter the room as quietly as possible and find a seat.
- If you are late to a workshop, you may lose your seat! Workshops are always in high demand and often sell out prior to the event. On-site wait-lists are used to fill empty seats. If you are late, your seat will likely be filled.
- If you miss a workshop, you can choose to attend another workshop that is not already sold out. Check in with registration on-site to work out your specific situation. Please note: Refunds will NOT be issued on missed workshops.

Will there be course handouts?

- General sessions will have handouts provided online approximately 30 days before the event. All preregistered attendees will be sent an email notice that the handouts are ready to be printed and downloaded.
- Workshop materials are all provided by the presenter and handed out during the session.

GENERAL INFORMATION, FAQs, AND EVENT CONTACTS

CE CREDITS

How many credits can I expect to earn while attending UOR?

-  You can earn up to 20 CE credits by attending general sessions in every time slot on all three days. This includes attendance at the mega, keynote, and wrap-up sessions.
-  Organize your time to fit your needs. The number of CE credits available is indicated on each course. You can maximize your time to earn as many credits as possible—or earn what you need.

How do I collect my CE credits?

-  There is a CE kiosk on-site where you can collect your CE certifications of completion and verification. To do this, follow these instructions: At the end of every session you will be given a CE code. Write down the code and visit the CE kiosk when convenient. At the kiosk, log in, take the course evaluation, and print your CE verification. The CE kiosk will be open all three days of the event. CE redemptions may also be done later from home. Customer service support is available onsite and by phone or email, if needed.

CE CLAIM CREDIT/CE KIOSK INFORMATION

Collect your continuing education credits while on-site at the event.

1. Write down the course code at the end of each session you attend.
2. Visit the onsite CE kiosk and complete the course evaluation.
3. Print the CE verification.

CE KIOSK HOURS:

Thursday, July 20	9:30 a.m. – 6:00 p.m.
Friday, July 21	7:00 a.m. – 6:00 p.m.
Saturday, July 22	7:30 a.m. – 3:00 p.m.

Visit <https://dentalacademyofce.com> to access the full library of self-study CE offered by the Dental Academy of Continuing Education!

PROVIDER ACCREDITATIONS AND DISCLOSURES

Endeavor Business Media is an ADA CERP-recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Endeavor's recognition of term extends from 05/1/2022 – 6/30/2025.

Nationally Approved PACE Program Provider for FAGD/MAGD credit.
Approval does not imply acceptance by any regulatory authority or AGD endorsement.
11/1/2022 to 10/31/2024.
Provider ID# 320452

Endeavor Business Media is an American Academy of Dental Hygiene (AADH) approved provider through December 31, 2023.

PROVIDER DISCLOSURE: Endeavor Business Media's Dental Division does not have a leadership or financial/commercial interest in any products or services discussed or shared in any of the educational activities presented at RDH Under One Roof 2023.

PROVIDER/CE PLANNING MEMBERS DISCLOSURE: Craig Dickson, Publisher, has no relevant financial interest that may create a conflict of interest related to RDH Under One Roof. Laura Winfield, Conference Manager, has no relevant financial interest that may create a conflict of interest related to RDH Under One Roof.

CAUTION! Completing a single continuing education activity DOES NOT provide enough information to claim that the participant is an expert on the topic presented. It is a combination of many educational activities and clinical experience that allows the participant to develop skills and expertise.

Conference Manager,
lwinfield@endeavorb2b.com
or direct at 918-831-9869

CONFERENCE

It is just such a welcoming atmosphere being
with people who understand our world.
So much education and just plain fun.

CONFERENCE DETAILS

Courses with commercial support provided by an unrestricted educational grant include the logo of the commercial supporter. Expanded information regarding speakers, session details, and other conference and event information can be found on the **RDH Under One Roof website, rdhunderoneroof.com**.

General Sessions comprise most of the UOR presentations. They are included in a full conference registration. Seating is first come, first serve, so arrive early to get a good seat!

Mega Sessions, Keynote, and Wrap-Up Sessions are all-attendee general sessions and are also included in a full conference registration.

Workshops are small hands-on sessions in a classroom setting. Workshops require additional registration to attend. Workshops sell out quickly! Do not miss the opportunity to attend—register early.

Networking Activities are fun non-CE activities designed to promote fellowship and mentorship with your peers. Be sure to check if an activity requires registration to attend. Lunch on Friday and Saturday and several receptions are included in a full conference registration.

DAY 1, THURSDAY, JULY 20, 2023

GENERAL SESSION

7:30 a.m. – 9:30 a.m.

Medical Emergency | 2 CE

Prepare For the Unexpected: An Interactive Experience Into Medical Emergency Preparedness

India Chance, RDH, CDIPC

LEARNING OBJECTIVES:

- Recognize common and emergent medical conditions: obtaining an accurate and compliant medical history assessment for each patient that is encountered.
- Describe pre-hospital provider protocols and the importance of team dynamics when implementing a medical emergency response.
- Identify the medical equipment required when performing intervention efforts during a patient medical emergency.
- Explain how to effectively document the intervention response in the patient's health record.
- Demonstrate an understanding of how to use the required medical emergency equipment through an interactive "hands-on" simulation.

With the increase of medically compromised patients presenting for dental treatment, it is essential for dental healthcare providers to learn how to successfully manage a patient medical emergency. This course will identify common medical emergencies that occur in a dental healthcare setting and describe the most prevalent signs and symptoms. Course content will also explore the components included in a medical emergency response plan: management protocols, required medical equipment, and dental team dynamics. Special emphasis will be placed on medical emergency prevention through the collection of a thorough patient health history assessment. A 20-minute interactive experience is provided for attendees to explore various "hands-on" stations to simulate managing different medical emergencies.

GENERAL SESSION

7:30 a.m. – 9:30 a.m.

Periodontal | 2 CE

Medical Protocols for Periodontal Therapy

Kathryn Gilliam, RDH, BA, MAAOSH, HIAOMT

LEARNING OBJECTIVES:

- Discover four tenants of the medical management of periodontal disease: risk assessment, root cause, laboratory testing, and wound care
- Illuminate the significance and challenges of oral biofilm
- Explore leading-edge practices to integrate medical protocols into dental hygiene routines efficiently and effectively.

As our understanding of the many links between the mouth and the body has increased, our roles have expanded to awareness of and focus on the whole health of our patients. Traditionally, dental health care practitioners have not approached dental disease the same way medical practitioners have approached systemic disease. There is much to be gained by adopting certain medical strategies, such as performing risk assessment, seeking the root cause, employing laboratory testing, and utilizing wound care protocols. We must unravel the complex interactions between host susceptibility, immune response, genetic associations, behavioral components, and disease control. As knowledge of oral-systemic connections has become widely understood and accepted, the next step is to integrate that knowledge into practical clinical protocols. It's time to elevate our identities as healthcare practitioners in this new age of integrated medicine and dentistry.

DAY 1, THURSDAY, JULY 20, 2023

GENERAL SESSION 7:30 a.m. – 9:30 a.m.

Ergonomics | 2 CE

Ergonomics in Dentistry - Protect your money maker!

Katrina Klein, RDH, CEAS, CPT

LEARNING OBJECTIVES:

- Learn risk factors for work related pain for the dental clinician.
- Learn practical solutions for a correct workspace.
- Learn how to practice comfortably to reduce fatigue and promote safety.
- Learn posture enhancing strengthening exercises for injury prevention.
- Learn and practice workday stretches that can be done chairside.

Practicing dental hygiene doesn't have to hurt! Stop the aches and pains commonly associated with the practice of hygiene and protect your physical health by using proper ergonomic equipment, effective chairside ergonomic strategies and preventive posture enhancing fitness exercises. Take a dive into effective stretching for muscle release on those chronically contracted trouble zones to feel better at the end of the day.

GENERAL SESSION 7:30 a.m. – 9:30 a.m.

Oral Pathology | 2 CE

I Screen, You Screen, We All Screen: "No one has ever done that before"

Susan Cotten, BSDH, RDH, OMT

LEARNING OBJECTIVES:

- Describe components of a comprehensive visual and tactile, extraoral, and intraoral evaluation, including evaluation of the oropharynx, and palpation techniques.
- Identify risk factors for oral cancers beyond tobacco, alcohol, and HPV.
- Recognize signs and symptoms associated with oral and oropharyngeal cancer, and other head and neck conditions.

According to the Oral Cancer Foundation, last year alone approximately 54,000 Americans were diagnosed with oral and oropharyngeal cancer, in five years only a little more than half of those diagnosed will survive this horrific cancer. When oral and oropharyngeal cancer is discovered in early stages there is an 80 to 90% survival rate, however, the majority are found in later stages. When performing the head and neck screening, many dental hygienists have had a patient say, "no one has ever done that before." Let's create a foundation of standards and protocols for comprehensive screening, to reduce the risk of liability, increase early detection, and save lives.

Join oral cancer coach Susan Cotten BSDH, RDH, OMT, as she dives into the science-based components of a comprehensive head and neck screening. This program looks at the additional risk factors and signs and symptoms associated with oral, oropharyngeal cancer, and other head and neck conditions, and explains why these are an essential piece of a thorough screening and risk assessment. Using Susan's instructional screening videos, emphasis will be given to looking at the components of a comprehensive visual and tactile, extraoral, and intraoral evaluation, the oropharyngeal screening, and palpation techniques. Dental hygienists play a critical role in early detection. Comprehensive screening is non-negotiable, and calibration in screening is essential to the continuity of care.

DAY 1, THURSDAY, JULY 20, 2023

GENERAL SESSION
10:00 a.m. – 12:00 p.m.

Special Needs | 2 CE

Understanding Deaf or Hard of Hearing Barriers in Dentistry

Amanda Zubricki, RDH, BS

LEARNING OBJECTIVES:

- Recognize the barriers placed in dental offices
- Apply ways to be accessible
- Identify hearing loss
- Summarize the differences in deaf or hard of hearing terms
- Interpret from the deaf or hard of hearing perspectives in educational and clinical settings

The ability to provide an accessible environment in dental offices is rarely discussed. Mask wearing creates communication barriers between the dental professional and the deaf or hard of hearing patients. You will learn tips to better your accessibility in the office and provide inclusion for everyone. Understanding their needs is key to being the best provider you can be. Emphasis will be placed on the patients with hearing loss. This course will discuss various perspectives in educational and clinical settings from a deaf dental hygienist.

GENERAL SESSION
10:00 a.m. – 12:00 p.m.

Sleep Apnea | 2 CE

Dying to Breathe: Hygienists' role in identifying orofacial and airway components which are driving chronic inflammation!

Kriston Reinsour, RDH, BSDH, CCSH, CSOM, HIAOMT, COSE, FAAOSH

LEARNING OBJECTIVES:

- Understand the critical role hygienists play in identifying and assessing underlying inflammation as it relates to the airway, breathing sleep-related issues, and the orofacial component in patient care.
- Learn how the developing anatomy from birth to adult contributes to airway conditions leading to increased inflammatory burden affecting oral, vascular, and overall systemic health leading to poor quality of life and premature death.
- Recognize and identify anatomy and conditions in the oral cavity which are common signs of an airway issue within your patient.
- Implement individualized treatment recommendations and assessments to help manage the patient's overall health and well-being

Your body's primary function is to survive by taking the next breath and will compensate in any way possible to do just that. Everything else is secondary. Find out how these compensations from birth to adulthood can lead to chronic inflammation throughout a lifetime leading to poor quality of life and unfortunately premature death.

Did you know that 50-70 million Americans suffer from Chronic disorders of sleep and wakefulness that can be diagnosed in the dental chair?

Many individuals do not know they have airway issues. In fact, more than half of people over the age of 65 are at high risk for obstructive sleep apnea, the most common type of the disorder, only 8 percent were tested for it, according to a recent University of Michigan study.

While sleep apnea goes undiagnosed, dental healthcare providers have an amazing opportunity to assess and identify an issue that could potentially save that patients life or even prevent a child from developing into an adult with sleep related issues. This presentation will help you identify anatomy in your patient indicating an airway issue and provide guidance on how to treatment plan, accordingly, ultimately enhancing the quality of life of every man, woman, or child that you see.

DAY 1, THURSDAY, JULY 20, 2023

GENERAL SESSION

10:00 a.m. – 12:00 p.m.

Pediatric | 2 CE

Positive Vibes Only: Behavior Guidance for Pediatric Patients

Supported by:

An Chih Do, RDH, MEd, MAADH

LEARNING OBJECTIVES:

- Recognize the difference between dental fear and anxiety (DFA) and dental phobia.
- Discuss the factors that contribute to dental anxiety in pediatric patients. Identify signs and symptoms of dental anxiety.
- Apply behavior guidance techniques for positive dental visits with pediatric patients.

The World Health Organization recognizes Odontophobia, the fear of going to the dentist, as a disease that affects the population and can be detrimental to overall health. The three classes of Odontophobia range from mild to severe, integrating Dental Fear and Anxiety (DFA). Further studies indicate the development of DFA has an increased prevalence between seven and nine years old. DFA can affect anyone, but children are particularly susceptible. DFA can lead to severe repercussions to one's oral health and is considered a significant barrier to receiving dental care. It can start with avoiding essential dental care, which leads to the deterioration of oral health. The neglect of oral care may lead to pain and the patient knowing extensive treatment is needed. Feelings of guilt, shame, fear, and anxiety arise, which continues the damaging cycle. Multiple factors may affect DFA, such as age, socioeconomic status, culture, siblings, clinical environment, dental procedures, parental/maternal anxiety, and dental visit experiences. This course will emphasize non-pharmacological behavior guidance techniques and appointment recommendations to help build positive pediatric patient visits to alleviate anxiety.

GENERAL SESSION

10:00 a.m. – 12:00 p.m.

The Business of Hygiene | 2 CE

The Dangerous Mouth

Lora Hooper, RDH; Gina Pritchard, DNP, RN, CNS, ACNP-BC; Anne Rice, RDH, BS, FAAOSH, CDP

LEARNING OBJECTIVES:

- Exactly how does the mouth put the entire body at risk? In this presentation you will learn the How? What? Where? Why? of the dangers that lurk in the oral cavity.
- You will understand, better than ever before, the multiple factors that impact the health of the mouth and subsequently the rest of the body.
- You will learn more about the role of the nasal cavity, breathing, and of gastro-intestinal health or "gut" health from tongue to tail as these pertain to the dangerous mouth in a bi-directional manner.
- You will understand the pathophysiology of the subsequent "downstream" effect on the blood vessels, heart, brain, kidneys and every other organ (in fact cell) in the body.
- Learn more about the red complex periodontal pathogens and what influences them and what they subsequently influence.
- Get to know the five high risk pathogens and the complexity of these bacteria that are the root of periodontal disease.
- Understand where they go, how they get there, what they do, and how we most effectively treat them? Recognize that maintenance of good oral health and regular access to dental care is more important than AP for a dental procedure.

With over 80% of American adults over age 35 having some form of gum disease, 50% of heart attacks and strokes being triggered by oral pathogens, a 7-fold increase in adverse pregnancy outcomes, and the relationship between pathogens and a 70% increase rate for Alzheimer's we are in the driver's seat for improving and saving lives. "Oral systemic health" is a buzz worthy phrase that conjures up confusion and may challenge us. As oral medicine professionals we must understand the science, physiology and pathophysiology of the connection between the mouth and the rest of the body.

10:00 a.m. - 12:00 p.m.

Professional Development | 2 CE

Finding your path to career fulfillment: it's never too late to start something new!

Carol A. Jahn, RDH, MS

LEARNING OBJECTIVES:

- Define what you want for your future; better clinical practice, side-gig, full-on career move
- Identify the knowledge, skills or degree you need to get where you go. Understand and value your 'worth'
- Discuss best practices in networking and interviewing for positions

Commercially supported by:

It is no secret that many hygienists today are unhappy with clinical practice; often with very good reason. Things such as not having enough or the right PPE, misclassification with a 1099, or clocking out for no-shows, do not contribute to a safe and healthy work environment. It is no surprise that many hygienists are seeking ways to find the respect, security, and satisfaction lacking in their current clinical practice setting. Whether you are looking for a different clinical practice setting, interested in a 'side-gig', or want to transition to nonclinical role, this course will help you develop a forward path to finding more fulfilling work. The course will include a panel of RDHs who will share their career path experiences

GENERAL SESSION

1:00 p.m. - 3:00 p.m.

Oral-Systemic Health | 2 CE

Perio, Diabetes, and CVD: Connections and Collaborative Treatment in the Dental Office

Susan Maples, DDS, MSBA

LEARNING OBJECTIVES:

- Etiologies of periodontal disease including genetics, diabetes, nicotine addiction, occlusion and bacterial assay
- Pathogenesis from chronic periodontal inflammation to cardiovascular disease
- The bi-directional relationship between Type 2 Diabetes and periodontal disease
- When and how to monitor HbA1C for successful periodontal therapy
- How to test for and interpret pathogen saliva testing and how to support full mouth disinfection with antibiotic specificity

What it takes for a successful tobacco cessation program in conjunction with full mouth disinfection. The old-school paradigm of treating periodontal disease with a sharp instrument and a string is gone for good. Now we recognize the root causes of this disease are multifactorial including the individual bacteria makeup of the biofilm, hyperglycemia, tobacco, food sensitivities, fungal infections and more. Plus, chronic inflammation and bacterial infiltration now have a proven causative relationship with a heart attack and stroke. It's our turn to become sophisticated diagnosticians and learn the new paradigm of individualized treatment planning for full mouth disinfection.

DAY 1, THURSDAY, JULY 20, 2023

GENERAL SESSION

1:00 p.m. – 3:00 p.m.

Dental Hygiene Products | 2 CE

Tune into Your Profession with New Products

David Rice, DDS

LEARNING OBJECTIVES:

- Qualify and quantify improvements in today's top performing products
- Clarify and compare the newest materials and products for various aspects of dentistry
- Explore and evaluate your best options in appropriate delivery of treatments
- Communicate and coach your patients to the most appropriate care
- Stimulate and spearhead the change you've always wanted

*This course is commercially supported.

If knowledge brings your patients' health and your opportunity, this fast-paced, highly-interactive learning experience is for you! You'll hear directly from manufacturers as they present their cutting-edge products with education. Company representatives speak for 10 minutes each, presenting the what, why, when, and how to implement. The pace is fast and the information is extremely valuable while respecting your time. *Please note that this is not a repeated course.

GENERAL SESSION

1:00 p.m. – 3:00 p.m.

Disease Management | 2 CE

Man vs. Microbiota The Evolution Story of the Human Microbiome

Katrina Sanders RDH, BSDH, M.Ed, RF

LEARNING OBJECTIVES:

- Discover the unfolding of the human microbiota over two billion years, exploring the evolutionary lifespan of the human microbiome.
- Describe the biological functions influencing dysbiosis of the microbiome.
- Discuss case selection in integrating an immersive approach to balancing the oral microbiota.
- Examine pragmatic care modalities aimed to provide a symbiotic microbiome and promote a state of health.

Commercially supported by:

This program is about a love story, two billion years in the making, between prokaryotic bacteria who began the process of human biology and disease in an impactful way. Over a spectrum of time, the human microbiota as we understand it has experienced an evolution developed from a myriad of influences. The result: an ever-changing imbalance of bacterial colonies primed for disease.

Across infancy, youth, puberty, adulthood and senior life cycles, our bodies experience physiological changes that guide diversity shifts in our microbiota. What's more: these shifts can create either a balanced and healthy environment or an inviting landscape for imbalance leading to disorder, illness and disease. As the prevalence of oral disease continues to escalate, dentistry is called upon to study and better understand the delicate role of microflora imbalance on successful patient outcomes.

Join periodontal hygienist Katrina M Sanders RDH, BSDH, M.Ed, RF as she explores the evolutionary process of the human microbiota, identifying the dramatic shifts in human physiology and societal trends that have deeply influenced the human microbiome as we understand it today. Discover how dental professionals have the ability to direct and modify the diversification and organization of the human microbiome to promote health and wellness once again.

Man vs. microbiota: let the games begin!

Just who do you think you are? Exploring your role in caring for patients with periodontitis and diabetes

Casey Hein, BSDH, MBA, RDH

LEARNING OBJECTIVES:

- Better educate patients about the biological mechanisms implicated in the interrelationship between diabetes and periodontitis
- Identify patients who have asymptomatic or poorly controlled diabetes and refer those at risk to the appropriate healthcare provider
- Determine how patients' HbA1c should inform the classification of periodontitis, including staging and grading in patients who have diabetes
- Identify periodontal instability and implement therapeutic strategies for long-term stabilization of the reduced periodontium of patients with diabetes

Commercially supported by:

FLORIDA PROBE
PROBE. CHART. EDUCATE. MOTIVATE.

PerioProtect

Periodontal science has evolved into such a rich evidence base that it has irrevocably obligated the profession of dental hygiene to advance into the primary healthcare arena. And, there's no better place to start than targeting patients with periodontitis and diabetes. Growth in the incidence of diabetes and the interrelationship between diabetes and periodontitis coalesce to produce a clarion call for oral healthcare providers: it's time to take our place in the war on diabetes. Yet, not all of us are ready to embrace this 'new calling' to primary healthcare. It's a little like the following story of three masons

After London was burned in the great fire of 1666, the renowned architect, Christopher Wren, was commissioned to rebuild Saint Paul's cathedral. While walking around the building site one day, Wren stopped to ask three masons this question: "What are you doing?" The first mason, working in a crouched position, answered, "I'm just a bricklayer." The second mason, half-standing answered, "I'm a builder". The third mason, who stood tall and worked with intensity, replied "I'm a cathedral builder" and with a gleam in his eye continued, "for the Almighty". Clearly, this was a calling with purpose for him.

Some of us are like the first mason. For him, it was simply a job. Others of us identify with the second mason who saw his work more as an occupation. Yet, how many of us, like the third mason who claimed he was a cathedral builder, believe we have a higher calling, with purpose? In other words, how many of us really recognize we're not simply tooth cleaners, but a healthcare provider uniquely positioned to help people who have diseases such as diabetes?

Please join us for an in-depth look at how hygienists can make a significant difference by screening patients for asymptomatic or poorly controlled diabetes, recognizing how glycemic control influences periodontal stability, addressing the unique oral health needs of patients with diabetes, and implementing progressive protocols that target the interrelationship between periodontitis and diabetes. As dental hygienists, we share a universal desire to make a difference in our patients' lives. This 'new calling' is one of the most promising opportunities in the history of dental hygiene. Let's do this!

GENERAL SESSION

10:00 a.m. – 12:00 p.m.

The Business of Dental Hygiene | 2 CE

The Pro's and Con's of DSO - Managing Your Success

Andrew Johnston, RDH, BSBM

LEARNING OBJECTIVES

- Be able to distinguish between what is and is not a DSO
- Understand career paths available at a DSO
- Be able to list two pros and two cons to working at a DSO
- Feel fully informed about your future options working at a private practice or DSO

Not every hygienist is suited to work at a Dental Support Organization and this course is designed to help you objectively learn what the positive and negative components are to working at one. You will be talked through various models and learn about career options that are not generally available in private practice. If you are looking for your next career step, this course is for you!

GENERAL SESSION

10:00 a.m. – 12:00 p.m.

Lasers | 2 CE

We just got a Laser, now what do we do with it?

Angie Wallace, RDH

LEARNING OBJECTIVES:

- Discuss the fundamentals of lasers, including the characteristics, delivery systems, and emission modes of lasers
- Understand the effects of lasers on tissue
- Identify device characteristics and clinical applications
- Relate the role of a Laser Safety officer to laser safety standards and regulatory requirements
- Identify how to operate laser instrumentation

This Laser class is for the beginner or for the advanced laser user. This fast paced laser course will help attendees gain knowledge and guidance for how and when to use the laser, as well as how to use them safely. This course will provide what a laser can do in the hands of dental hygienists as well as show case studies and new technology of what to expect in the future with Lasers. There will be ample time allowed for questions and answers and create the excitement of getting lasers into your office and how to start using them on Monday morning.

GENERAL SESSION

10:00 a.m. – 12:00 p.m.

Forensic Dentistry | 2 CE

Bones, Bugs, Fire & Flies. An introduction to forensic odontology

Amber Riley, MS, RDH, FAAFS, FIACME

LEARNING OBJECTIVES:

- Reinforce the value and dependability of accurate dental records for many matters of law.
- Be introduced to 'NamUs', the collaborative effort of County, State and National systems for the missing, unidentified and unclaimed persons.
- Learn about government and private national and multi-national organizations developed to respond to large scale catastrophic events resulting in mass fatalities.

The roles that dental professions serve in matters of law and other forensic sciences continues to evolve. Forensic odontology contributes a scientifically sound method human identification, be it a single individual or a multiple fatality incident. This work serves missing person and cold case investigations, and in matters of civil litigation that examine the parameters or standards of providing dental care within the licensee's scope of practice and much more. This program will provide a comprehensive view of forensic dental autopsy along with the photographic, radiographic and clinical management techniques necessary when examining several postmortem states including skeletonized, fragmented, decomposed and burned.

Evidence Based Care | 2 CE

For Mature Audiences Only....Breaking the myths about using fluoride varnishes and tooth creams with our moderate to high risk adult patients.

William Paveletz, DMD

LEARNING OBJECTIVES:

- Understand the proper use of dental caries assessment forms (both ADA and CAMBRA) to explain to their patients the need for fluoridation treatments.
- Evaluate moderate to high risk patients and be able to address alternative fluoridation therapies
- Discuss appropriate methods to reduce caries risk and explain strategies for treatment of carious lesions

Commercially supported by:

We know the importance of using fluoridation with our kids when their teeth are developing, but do we stress the importance with our adult population. The use of fluoride varnish benefits both younger and older patients. With our aging population we have to evaluate their risk and how we can prevent further dental issues.

This course explores the benefits of using fluoride varnishes and tooth creams and how we can address our moderate to high risk patients

WORKSHOP

Professional Development | 2 CE

Oh, The Places You Will Go! The journey from student to professional during your first 5 years post-graduation.

Sue Scherer, RDH, BS

Britt Glauz, BSDH, RDH

LEARNING OBJECTIVES:

- Finding your dental home - temping, DSO, private practice, FQHC, pediatrics, periodontics
- Knowing your personal and professional values and ethics
- That's not what I learned in school - becoming a lifelong learner
- RDH to BSDH, and beyond - furthering your education
- Beyond the treatment room - network, personal growth, caring for your mind and body
- A journey does not happen overnight

Commercially supported by:

The first 5 years out of dental hygiene school can set the tone for the rest of your profession. The journey from student to professional can be both exciting and scary, but the journey does not have to be lonely. There is a whole professional community out there ready and willing to share their knowledge to help you transition from student to "the real world". This course will help you to think about the steps to take to be fulfilled professionally. Learn strategies to help find the office that is right for you based on your ethics & values, your passion within the profession and the salary & benefits you desire. Learn how to be a dental hygiene professional beyond the walls of an office by investing in your profession, becoming a lifelong learner and networking. Spend time hearing from a diverse panel of dental hygienists in varying stages of their professional journey about the steps they took to succeed in "the real world".

CONFERENCE DETAILS

DAY 2, FRIDAY, JULY 21, 2023

NETWORKING ACTIVITY

12:00 p.m. - 1:30 p.m.

Lunch on the Exhibit Hall Floor

WORKSHOP

12:45 p.m. - 3:45 p.m.

Lasers | 3 CE

Laser FUNDamentals! Lighting up your Hygiene Protocols

Florie Mancilla, BS, RDH

LEARNING OBJECTIVES:

- From this course, you will learn fundamental training around basic physics, safety and hygiene soft tissue applications for diode laser systems.
- Explain proper safety and clinical parameters.
- Comprehension of laser physics and tissue interactions. Understanding laser settings and procedures best suited for daily practice.
- Chart documentation for laser use.

Commercially supported by:

This three-hour workshop is designed to make you feel comfortable picking up a laser and implementing it into your daily hygiene schedule. Whether you are a novice laser user or need a refresher course, we will explore the benefits and healing properties of light therapy in our hygiene operator. Discussion will include procedures such as: laser bacterial reduction, laser assisted periodontal therapy, treatment of oral lesions via photobiomodulation and biostimulatory effects that enhance clinical care. A hands-on component will be included in this workshop.

NETWORKING ACTIVITY

1:00 p.m. - 3:00 p.m.

All attendees welcome

American Academy of Dental Hygiene Annual Business Meeting

Commercially supported by:

Please join us as our guest! The mission of the American Academy of Dental Hygiene (AADH) is to foster the continuing pursuit of education and research in the art and science of dental hygiene, provide formal recognition of excellence in the practice of dental hygiene, and recognize distinguished community service in the effort to foster improved oral health. Our vision is to foster fellowship, mentorship, and leadership. AADH serves the dental hygiene profession as a course-approval entity.

NETWORKING ACTIVITY

1:00 p.m. - 3:00 p.m.

Invite Only

*Lunch and Learn

Commercially supported by:

DAY 2, FRIDAY, JULY 21, 2023

GENERAL SESSION 1:00 p.m. – 3:00 p.m.

Preventative Dentistry | 2 CE
It's Not You: It's Your Saliva

Amber Auger, RDH, MPH

LEARNING OBJECTIVES:

- Review how the pH of the mouth influences soft and hard tissue oral diseases
- Discover powerful communication skills to increase the patient's ownership of their current oral health
- Evaluate pH testing for your office and how to implement it into a patient's preventive visits, and compare salivary tests to test periodontal pathogens.
- Determine how the oral microbiome is trained for optimal health

It can be highly discouraging when patients continue to have cavities despite improvements in their oral health. This can disrupt their oral health philosophy and create the belief that "cavities are normal for me" or even "I just have soft teeth." The pH of our patient's saliva plays a vital role in their oral cavity's hard and soft tissues. We have the unique opportunity to identify a patient's specific risk and provide treatment recommendations accordingly.

GENERAL SESSION 1:00 p.m. – 3:00 p.m.

Dental Hygiene Products | 2 CE
New Products to Tune Your Profession

David Rice, DDS

LEARNING OBJECTIVES:

- Qualify and quantify improvements in today's top performing products
- Clarify and compare the newest materials and products for various aspects of dentistry
- Explore and evaluate your best options in appropriate delivery of treatments
- Communicate and coach your patients to the most appropriate care
- Stimulate and spearhead the change you've always wanted

**This course is commercially supported*

If knowledge brings your patients' health and your opportunity, this fast-paced, highly-interactive learning experience is for you! You'll hear directly from manufacturers as they present their cutting-edge products with education. Company representatives speak for 10 minutes each, presenting the what, why, when, and how to implement. The pace is fast and the information is extremely valuable while respecting your time. *Please note that this is not a repeated course.

CONFERENCE DETAILS

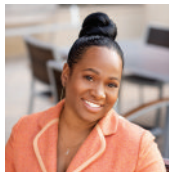

DAY 2, FRIDAY, JULY 21, 2023

GENERAL SESSION

1:00 p.m. – 3:00 p.m.

Clinical Dental Hygiene | 2 CE

Raiders of the Lost Art: Mastering Instrumentation Techniques

Joy Void-Holmes, RDH, BSDH, DHSc;
Jessica Atkinson, MEd, BSDH, RDH;
Shelley Brown, MEd, BSDH, RDH

LEARNING OBJECTIVES:

- Describe innovative periodontal instrument design features that support ergonomic health and impact the delivery of dental hygiene therapy
- Demonstrate the fundamental skills of manual periodontal instrumentation.
- Utilize evidence-based literature and reputable sources to support the use of a broad range of hand instrumentation.
- Define and discuss ergonomic principles that can prevent musculoskeletal disorders commonly experienced by dental health professionals.

Do you ever look at a hand instrument and ask, “what am I supposed to do with this”? Do you ever feel like you are a contortionist performing in Cirque du Soleil to remove calculus? Do you ever feel like you can’t find the correct clock position because you “can’t go past 12 o’clock”? Are you stuck “pushing and pulling” with your fingers because you forgot how to “rock and roll” with your wrist? If you identify with any of these statements, then this course is for you. In the absence of ultrasonic instrumentation, dental health care practitioners (DHCP) will need to feel confident in providing non-surgical periodontal treatment using hand instruments. This course will help you to master your instrumentation techniques, maximize your full clinical potential and unleash your inner scaling warrior.

MEGA SESSION

3:00 p.m. – 5:00 p.m.

Instrumentation | 2 CE

INSTRUMENTATION REIMAGINED The future of hand scaling has arrived.

Amanda Hill, BSDH, RDH

LEARNING OBJECTIVES:

- Demonstrate confidence in the basics of general hand instrumentation, including the ergonomic principles needed to deliver quality patient care
- Recognize the importance of instrument selection for optimal patient care
- Analyze unique instrument patterns that can help reduce the risk of hand fatigue and increase patient comfort
- Discuss the advantages of Sharp-Free Instruments and the benefits of a modified instrumentation technique

Instrumentation can play an integral role in patient comfort, quality of care, and career longevity. Often we learn instrumentation in school, and that's it. Then the hygiene appointment becomes a game of beat-the-clock. And we clinicians have the tendency to stick with our top five instruments missing out on new innovations in instrumentation that can improve both the patient outcome and the clinician experience. Learn about instruments and techniques that will help you improve your efficiency and ergonomics and realize that the universal is not as universal as we had hoped!

Commercially supported by:

YOUNG®

GENERAL SESSION

7:30 a.m. - 9:30 a.m.

Oral Pathology | 2 CE

A Mouthful: Differential Diagnosis for Periodontal Pathologies

Andreina Sucre, International Dentist (DDS), RDH, MS

LEARNING OBJECTIVES:

- Identify pathologies associated with gingival enlargement and gingival bleeding
- Classify and create a decision tree for non-plaque-induced gingival disease pathologies
- Apply the provided knowledge when establishing differential diagnoses for non-plaque-induced gingival enlargements.
- Develop a system to effectively communicate the occurrence of gingival pathologies among the dental team.
- Interpret the clinical signs of the pathologies associated with gingival hyperplasia.

There is no other topic that interests and complexes the dental professional more than oral pathology. When examining a patient with non-plaque induced gingivitis, we must pay attention to clinical signs of erythema, edema, pain, heat, loss of function, swelling in the gingival margin, blunting of the papilla, bleeding, and discomfort upon probing. The complexity of these cases allows for a great margin of error and calls for key players with knowledge of oral anatomy and physiology. Dental professionals hold a unique understanding of the oral cavity that enables us to establish differential diagnoses, treatment plans, and referrals. As key oral care providers we need to see beyond our scope and take all these factors into account when determining a differential diagnosis. A better understanding of periodontal pathologies enables us to better manage lesions and assist in decreasing recurrence.

Gingival enlargement is one of the frequent features of gingival disease. It could be associated with the presence or absence of plaque-biofilm or not. Due to the variety of presentations, diagnosing the array of pathologies associated with gingival hyperplasia could become challenging for the dental team. For this analysis, clinical manifestations of gingival enlargements are focused only on those not induced by the presence of plaque. It is important to note that typical plaque control is not the recommended treatment in these cases. The importance of a correct decision tree to classify these pathologies is vital to narrow the differential diagnoses.

This course will guide the practitioner in using a decision tree to assist in determining a differential diagnosis for periodontal pathologies. This interactive course takes participants through a variety of case studies allowing the dental professional to experience real life scenarios to better equip them for clinical practice.

CONFERENCE DETAILS

DAY 3, SATURDAY, JULY 22, 2023

GENERAL SESSION

7:30 a.m. – 9:30 a.m.

Anesthesia | 2 CE

"I Have Become ... Profoundly Numb!": Local Anesthetics, Vasoconstrictors, and Considerations for Every Dental Hygienist

Tom Viola, R.Ph., CCP, CDE, CPMP

LEARNING OBJECTIVES:

- Differentiate between the two major classes of local anesthetic agents with respect to their distribution, metabolism, adverse effects, drug interactions, and contraindications.
- Discuss the rationale for the use of vasoconstrictors in local anesthetic solutions and their potential effects in common organ system disease states.
- Specify the various local anesthetic agent combinations most commonly used in dental hygiene and the rationale for their use in specific clinical situations.

Commercially supported by:

Management of odontogenic pain may be accomplished through a clinical approach that successfully incorporates local anesthesia. However, improper and inappropriate use of local anesthetic agents has the potential to produce life-threatening, systemic adverse reactions. Thus, a thorough knowledge of the pharmacology and therapeutics of local anesthetic agents is essential for their safe and effective use. This program will provide participants with an overview of local anesthetic agents commonly used in dental hygiene practice. Using case scenarios, special emphasis will be given to developing strategies and techniques essential to accurately identify the need for pain control, individualize patient care, and assess the efficacy of the local anesthetic agents administered.

GENERAL SESSION

7:30 a.m. – 9:30 a.m.

Disease Management | 2 CE

The Clinical Manifestations of Sickle Cell Disease and the Dental Patient

Linda Chandler-Jacobs, BS, RDH

Jean Morency, DMD

LEARNING OBJECTIVES:

- What is Sickle Cell Disease? What causes it and the known treatments.
- Precautions to observe when diagnosing or treating a patient with Sickle Cell Disease or the Sickle Cell Trait.
- Understand why procedures such as dental implants, orthodontia and endodontic treatments may fail.
- Recognizing and preventing a "Sickle Cell" Crisis in the dental operator.
- Recommended codes for dental and medical procedures in the dental office.
- Covid-19 and the Sickle Cell patient.
- Sickle Cell Disease has been around for over 5000 years. Dental Professionals know very little about this disease and the necessary precautions they may need to take when treating a patient with Sickle Cell Disease.

This presentation will serve as an educational tool for the Dental Professional and Staff about the disease and the precautions they should be aware of when treating patients with Sickle Cell Disease or the Sickle Cell Trait.

Professional Development | 2 CE

Dental Hygienist: That's Not My Name!

Katrina Sanders, RDH, BSDH, Med

LEARNING OBJECTIVES:

- Review the critical role of the clinical dental hygienist in the 21st century
- Evaluate how 'The Messy Middle' paves the way for leadership in oral health professionalism
- Identify the characteristics of 'Syndicated Leadership' that create lasting impact across the healthcare profession

Doctors, patients, and insurance companies, oh my!

The pressures of the periodontal probe pale in comparison to the plaque-ridden, tardy, 'no offense but I hate you' pressures of the clinical dental hygienist in the 21st century.

We did not ask to be positioned as leaders within the practice, we did not ask to have our work stand up to insurance policies and we certainly did not ask to abridge our care for late patients or perform bloody bib prophecies on patients with low dental IQ or be told we are 'just' a dental hygienist despite the immense education, training and hand skills required for our work... and yet, here we are.

Research continues to unpack the incredible importance of inflammatory management for generalized systemic health, airway management lends itself to occlusal and tethered oral tissues influencing general health and a renewed sense of vitality has empowered a nation of COVID-19 survivors to seek preventive healthcare.

While we may perhaps question the value and worth of our role within the healthcare profession, we must always remember that WE are the answer. Join Katrina Sanders as she walks participants through a lively, interactive program focused on elevating the work of the mid-level oral health care provider. Afterall, we aren't 'just' the dental hygienist, and this is our opportunity to unite, elevate and reimagine how we show up, not only for our patients, but for ourselves.

RDH

Evolution

July 17-19, 2023 | Nashville, TN
Gaylord Opryland Resort & Convention Center

Announcing the 3rd Live RDH Evolution conference for dental hygienists who are passionate about evolving their career!

- **RDH Evolution** provides a unique opportunity for dental hygienists to learn from their peers how to get the most from their career.
- Attendees will focus on professional development, goal setting, clinical expansion, speaking skills, and how to be published.
- Attendees will meet and learn from other like-minded dental professionals, while networking with corporate sponsors who hire and work with dental hygienists.
- This career enhancement program will accelerate your career goals as you work with motivated dental hygienists and understand how they used their skills to expand their expertise both in and out of the clinic.

Benefits of Attending:

- Learn directly from dental hygiene thought leaders you recognize
- Grow from interactive discussions and define your next steps

EXHIBITION

Explore the industry's most innovative products and services available, displayed by more than **125 exhibitors**. One of the best aspects of RDH Under One Roof is that the exhibitors are 100% there to talk to you, the dental hygienist. RDH Under One Roof is an event that is truly all about dental hygienists.

“**The exhibit hall was AMAZING!** You learn so much and get so many free samples!”

“**I loved seeing all the new products!** Everyone wants to talk to you, is helpful, and happy to answer any questions I had.”

“**Such a great conference!** The vendors were there to talk to US and seemed to really value our input!”

95% of attendees said the overall quality of exhibitors is good or excellent*

Go to **RDHUnderOneRoof.com** to search for a company, product, or service you're interested in visiting, and plan your trip through the exhibit hall.

NEWSLETTERS

RDH eVillage

RDH eVillage is a weekly opt-in e-newsletter that is prepared for dental hygiene professionals who are looking for hard-hitting current information. Each issue contains clinical tips, new products, industry news, answers to clinical questions, practical up-to-date articles, surveys, continuing education, and more.

RDH Graduate

RDH Graduate is an e-newsletter for hygiene students and new hygienists. Dental hygiene's newest practitioners face the challenge of keeping up with the quickly evolving dental profession. RDH Graduate provides timely information for dental hygiene students and recent graduates to help them stay abreast of changes in treatment protocols, technology, and career choices.

Through the Loupes

YOUR CHAIRSIDE COMPANION FOR CLINICAL AND PRODUCT UPDATES

The Through the Loupes daily newsletter provides case studies and product information to help you expand your clinical acumen. The newsletter is directed by Stacey Gividen, DDS, and Pamela Maragliano-Muniz, DMD.

Morning Briefing

The Morning Briefing daily newsletter keeps you current on the latest developments in dentistry, including those related to the coronavirus pandemic. It combines the resources of *Dental Economics*, *DentistryIQ*, *Perio-Implant Advisory*, and *RDH magazine*.

200+ STORES, 250+ RESTAURANTS

All Just Minutes From The Gaylord Opryland Resort and Convention Center

RDH Under One Roof welcomes you to Nashville, Tennessee — Music City!

Nashville is home to several unique dining, shopping, and entertainment options. Come and discover the adventures Nashville has to offer. The adventurous and entertaining city of Nashville is sure to delight you.

Nashville offers numerous mouthwatering cuisine dining spots that make for an ultimate dining experience. From celebrity chef-driven restaurants, dazzling nightclubs, sleek lounges, and entertainment on Broadway, these choices should appeal to any budget or preference. From trademark breweries, distilleries, and sports-focused pubs; you are sure to never run out of amazing places to eat or drink in Nashville.

There is a diverse blend of more than several hundred retailers. Whether you prefer mega-malls with well-known stores, or charming boutiques, the Nashville shopping scene has something for everyone. Between the several museums, historical city tours, and ghost tours, there is plenty to explore. If you enjoy country music, then Nashville is the place for you. Visit the historic Grand Ole Opry, Country Music Hall of Fame, and Ryman Auditorium. If you want to try a new experience, hop on the largest showboat, and enjoy the grand General Jackson for dinner, entertainment, and a Riverview of Nashville.

From piano bars to clubs, you can discover live country music, dinner shows, and nightlife entertainment. Enjoy live music around every corner as your walk down Broadway discovering local and famous bars. People can enjoy great food during the day and stop by a local brewery for some craft beer and live music in the evening.

TIPS TO GET YOUR DENTIST TO PAY

YOUR ATTENDANCE IS WORTH THE INVESTMENT!

3 easy steps to convince your dentist to contribute financially to your trip

1. DO YOUR RESEARCH

Identify conference sessions that satisfy your professional goals. Use our Interactive Floor Plan to locate exhibitors that address specific needs within your office. Prepare a list of benefits that you can achieve by attending **RDH Under One Roof**.

2. SHOW HOW EVERYONE BENEFITS

Share your event goals with your office and demonstrate how your participation will help your team achieve their goals. Offer to give a presentation upon returning from RDH Under One Roof to share any new ideas or products that you learned about during the event.

3. GAIN BUY-IN

Write out your ideas and submit them to your dentist with your intended schedule of conference track subjects and the list of companies you hope to network with. Include the cost of airfare and lodging and make sure your manager knows a Full Conference Registration includes two days of lunch!

Visit <https://www.rdhunderoneroof.com/rdhuor2023/tips> to download and customize the Letter to Your Supervisor to get started.

REGISTRATION INFORMATION

Registering for **RDH Under One Roof** is easy! Consult the table below to decide which registration option is right for you—The First-Timer Full Conference and Alumni Full Conference options offer the best value.
