WHY ATTEND?

Now in its 22nd year, **RDH Under One Roof** is a conference and exhibition exclusively for dental hygienists. RDH Under One Roof is **THE event for the dental hygiene profession.**

Take it from these hygienists, this is an event you don't want to miss!

“ **GREAT PLACE TO NETWORK WITH FELLOW PEERS.**

And, learn about new products that help dental hygienists do our job more ergonomically and efficiently.”

1,750+ Dental Hygienists

20 CE Credits

“ **IT IS A MUST-ATTEND EVENT,**
you learn a wealth of
information, and you make
tons of friends and connections.”

“ **IT'S THE BEST EVENT OF
THE YEAR** and you are
cheating yourself out of so
much by not attending. You
owe it to yourself for learn-
ing and networking.”

125+ Exhibits

Friday, July 22, 2022	10:00 a.m. – 2:30 p.m. & 5:00 p.m. – 7:30 p.m.
Saturday, July 23, 2022	10:00 a.m. – 2:30 p.m.

REGISTRATION

What is included in a full conference registration?

- 🚫 All general sessions, including the mega, keynote, and wrap-up sessions
- 🚫 Up to 20 CE credits if you attend only general sessions all three days
- 🚫 Access to the exhibit hall floor to visit and network with 125+ exhibitors
- 🚫 Lunch on the exhibit hall floor Friday and Saturday
- 🚫 Networking reception on Thursday evening* and a reception on the exhibit hall floor Friday evening

See page 55 for additional details.

Please note: Workshops are not included in a full conference registration. Additional registration is required to attend workshops.

GENERAL EVENT

How do I get my dentist to help pay my tuition?

- 🚫 See page 54 for tips on how to justify your trip to your dentist.

What meals are included?

- 🚫 Full conference attendees receive lunch on Friday and Saturday and drinks and snacks at each of the networking receptions on the exhibit hall floor.

TRAVEL TIPS

How do I book my hotel room?

See page 53 for details.

How do I find a roommate?

- 🚫 Join our private Facebook group (RDH Under One Roof Official) to become acquainted with fellow attendees.

What do I wear? How should I pack?

- 🚫 Typical attire for attendees ranges from business casual to casual. It will be hot outside, but the session rooms will be set for 72 degrees. This can feel chilly to some, so bring a sweater or light jacket to wear during the day.

What activities does Orlando offer?

- 🚫 A lot! See page 52 for a list of activities.

EXHIBIT HALL

Will I have time to visit the exhibit hall?

- 🚫 Yes, and there is so much to see! Visit the exhibit hall during lunch, in between sessions, and during the evening receptions.
- 🚫 See pages 47-49 for a full diagram of the exhibit hall and a list of exhibiting companies.

CONFERENCE

What is a general session?

- General sessions are large group courses open to all registered conference attendees. Seating is first come, first served, so come early to get a good seat. No additional registration is needed to attend any of the general sessions.

What is a workshop?

- Workshops are small group courses with hands-on elements. Workshops are ticketed and require additional registration for a nominal fee. If you are more than 15 minutes late to a workshop, you will not be allowed in.

What if I am late to a course?

- In an effort to keep the conference program on schedule, courses start promptly. Be early!
- If you are late to a general session, try to enter the room as quietly as possible and find a seat.
- If you are late to a workshop, you may lose your seat! Workshops are always in high demand and often sell out prior to the event. On-site wait-lists are used to fill empty seats. If you are late, your seat will likely be filled.
- If you miss a workshop, you can choose to attend another workshop that is not already sold out. Check in with registration on-site to work out your specific situation. Please note: Refunds will NOT be issued on missed workshops.

Will there be course handouts?

- General sessions will have handouts provided online approximately 30 days before the event. All preregistered attendees will be sent an email notice that the handouts are ready to be printed and downloaded.
- Workshop materials are all provided by the presenter and handed out during the session.

GENERAL INFORMATION, FAQs, AND EVENT CONTACTS

CE CREDITS

How many credits can I expect to earn while attending UOR?

- You can earn **up to 20 CE credits** by attending general sessions in every time slot on all three days. This includes attendance at the mega, keynote, and wrap-up sessions.
- Organize your time to fit your needs. The number of CE credits available is indicated on each course. You can maximize your time to earn as many credits as possible—or earn what you need.

How do I collect my CE credits?

- There is a CE kiosk on-site where you can collect your CE certifications of completion and verification. To do this, follow these instructions: At the end of every session you will be given a CE code. Write down the code and visit the CE kiosk when convenient. At the kiosk, log in, take the course evaluation, and print your CE verification. The CE kiosk will be open all three days of the event. CE redemptions may also be done later from home. Customer service support is available onsite and by phone or email, if needed.

CE CLAIM CREDIT/CE KIOSK INFORMATION

Collect your continuing education credits while on-site at the event.

- Write down the course code at the end of each session you attend.
- Visit the onsite CE kiosk and complete the course evaluation.
- Print the CE verification.

CE KIOSK HOURS:

Thursday, July 21	10:00 a.m. – 6:00 p.m.
Friday, July 22	7:00 a.m. – 6:00 p.m.
Saturday, July 23	7:30 a.m. – 3:00 p.m.

Visit dentalacademyofcontinuingeducation.com to access the full library of self-study CE offered by the Dental Academy of Continuing Education!

PROVIDER ACCREDITATIONS AND DISCLOSURES

Endeavor Business Media is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/goto/cerp. Endeavor's recognition of term extends from 11/1/2019 – 12/31/2022.

Endeavor Business Media is designated as an approved AGD PACE program provider by the Academy of General Dentistry. The formal continuing education programs of the program provider are accepted by the AGD for fellowship, mastership, and membership maintenance credit. Approval does not imply acceptance by state or provincial boards of dentistry, or AGD endorsement. The current term of approval extends from 11/1/2019 – 10/31/2022.

Provider #: 320452

Endeavor Business Media is an American Academy of Dental Hygiene (AADH) approved provider through December 31, 2022.

CONFERENCE

Provider Disclosure: Endeavor Business Media's Dental Division does not have a leadership or financial/commercial interest in any products or services discussed or shared in any of the educational activities presented at RDH Under One Roof 2022.

Provider/CE Planning Members Disclosure: Craig Dickson, Publisher, has no relevant financial interest that may create a conflict of interest related to RDH Under One Roof. Laura Winfield, Conference Manager, has no relevant financial interest that may create a conflict of interest related to RDH Under One Roof.

CAUTION! Completing a single continuing education activity DOES NOT provide enough information to claim that the participant is an expert on the topic presented. It is a combination of many educational activities and clinical experience that allows the participant to develop skills and expertise.

Provider contact information: Laura Winfield, Conference Manager, lwinfield@endeavorb2b.com or direct at 918-831-9869.

CONFERENCE DETAILS

Courses with commercial support provided by an unrestricted educational grant include the logo of the commercial supporter. Expanded information regarding speakers, session details, and other conference and event information can be found on the RDH Under One Roof website, rdhunderoneroof.com.

General Sessions comprise most of the UOR presentations. They are included in a full conference registration. Seating is first come, first serve, so arrive early to get a good seat!

Mega Sessions, Keynote, and Wrap-up Sessions are all-attendee general sessions and are also included in a full conference registration.

Workshops are small hands-on sessions in a classroom setting. Workshops require additional registration to attend. Workshops sell out quickly! Do not miss the opportunity to attend—register early.

Networking Activities are fun non-CE activities designed to promote fellowship and mentorship with your peers. Be sure to check if an activity requires registration to attend. Lunch on Friday and Saturday and several receptions are included in a full conference registration.

GENERAL SESSION

Public Health | 2 CE

Speak Up: Identifying Signs of Abuse and Advocating for Our Most Vulnerable Populations

Alyssa Aberle, RDH, MBA

Objectives:

- Identify signs of abuse and neglect for children, seniors, and patients with special needs
- Discuss the role of the dental hygienist in assessing and investigating pertinent findings
- Understand mandated reporter laws and how to report cases of possible abuse or neglect

No dental hygienist ever wants to make the call to report suspected abuse or neglect. But it is our duty to step up and speak up for those who can't speak up for themselves. Dental hygienists often feel unprepared or ill equipped to identify signs of abuse and neglect and report them to the appropriate authorities. In this course, dental hygienists will gain confidence in their recognition of these signs and understand the laws about when it is necessary to report. Your confidence could save a life.

8:00 a.m. – 10:00 a.m.
GENERAL SESSION

Oral Systemic Health | 2 CE

Insulin Resistance and Diabetes: The relationship to Oral and Systemic Disease

Lory Laughter, RDH, MS

Objectives:

At the end of this course the participant will:

- Understand the role cytokines play in diabetes and insulin resistance.
- Recognize the relationship between IR and diabetes related to oral health.
- Develop health history questions designed to recognize possible insulin resistance and related disorders.
- Create an education plan for patients to help them play an active role in addressing diabetes and insulin resistance as well as associated inflammatory diseases.

Insulin resistance (IR) is considered a chronic and low level inflammatory condition. It is closely related to altered glucose tolerance, abdominal obesity, and coronary heart disease. IR is accompanied by an increase in the inflammatory cytokines like interleukin-1 and 6, tumor necrosis factor- α . Levels of these cytokines also effect the progression of IR.

Periodontitis is the most common oral diseases. Pro-inflammatory cytokines are released in the disease process of periodontitis, including IL-1 and IL-6. Periodontitis can be attributed with exacerbation of IR. Data in the literature supports a "two-way relationship" between diabetes and periodontitis.

The co-existence of systemic and oral inflammatory diseases warrants closer examination by dental professionals. Appropriate health history questions and review is essential in helping patients maintain oral health.

8:00 a.m. – 10:00 a.m.
GENERAL SESSION

Anesthesia | 2 CE

Are you numb yet? Local anesthesia for today's dental hygienist

Alyssa Delgado, RDH, MSDH

Objectives:

- Select the appropriate anesthetic and injections based on the unique patient needs and medical history
- Relate the anatomy of the oral soft tissue, cranial nerves, and blood vessels to the delivery of local anesthetics
- Troubleshoot injection techniques and manage patient complications, as needed

This clinical course is ideal for new or experienced dental hygienists who would like an engaging refresher to hone their skills in local anesthesia techniques. This targeted 2-hour course builds your confidence and skills in the delivery of local anesthesia and provides you with a review of the anatomical structures and navigational approaches necessary to troubleshoot problems with each injection.

10:30 a.m. – 12:30 p.m.
GENERAL SESSION

Oral Pathology | 2 CE

HPV and oral sex—You want me to discuss what with my patients?

Catrice Opichka, RDH, MS

Objectives:

- Identify the risk factors associated with HPV-related oropharyngeal cancer
- Recognize the obstacles clinicians face in providing HPV education in the dental practice
- Discover the tools necessary for patient education and discussing HPV with our adult and adolescent patients

There are many topics we discuss in our dental practice that do not come easily for individuals on our team. From bulimia to addiction, we encounter tough topics with which we struggle to have effective communication with our patients, and sometimes choose to avoid these topics altogether. For example, discussing the cause and effect relationship between sexual behaviors and oral cancer is not easy for anyone. However, since nearly every person who is sexually active will have an HPV infection in their lifetime, and since HPV is now the leading cause of oropharyngeal cancer, it has become a topic worth investigating and sharing with our patients.

In this course we will touch on the impact HPV has had on oropharyngeal cancer risk and shed light on how we can improve oral cancer detection in our practice. We will explore how to lead our team in building protocol for patient education that can be customized to fit the culture in our individual practices. We will discover methods to encourage involvement of the entire dental team by providing the tools necessary for effective HPV communication.

THURSDAY, JULY 21, 2022 | DAY 1

10:30 a.m. – 12:30 p.m.
GENERAL SESSION

Mental Health | 2 CE

From burnout to recovery: Strategic solutions to address and manage burnout

Kari Carter-Cherelus, RDH, DA

Objectives:

- Recognize the signs of burnout
- Identify effective strategies to prevent, address, and manage burnout
- Reframe the clinical mindset to recover from trauma associated with burnout

According to the World Health Organization, burnout syndrome is a result of chronic workplace stress that has not been successfully managed. Health-care providers suffer from burnout at an alarming rate, increasing the likelihood of providing less than satisfactory patient care due to their overwhelming stress level. Burnout syndrome can contribute to physical and psychological health conditions that can negatively affect the sufferer's overall health and happiness. This interactive discussion will provide an overview on how to identify burnout and successfully implement strategies to overcome the damaging effects.

10:30 a.m. – 12:30 p.m.
GENERAL SESSION

Dental Hygiene Products | 2 CE

Let the Sun Shine on New Products!

Tricia Osuna, RDH, BSDH, FAADH

Objectives:

- Recognize improvements in products used by dental professionals
- Compare new materials and products for various aspects of dentistry
- Evaluate options in appropriate delivery of treatments
- Communicate effectively to patients and assist in the business of the dental practice
- Recognize and evaluate changes to implement in the practice

This creative concept in education offers attendees an opportunity to hear directly from manufacturers as they present their newest products with education. Company representatives speak for 10 minutes, presenting education—not pricing or competitive information—on their products. The pace is fast and the information extremely valuable while respecting your time. This is a creative and thought-provoking learning experience. Please note that this is not a repeated course.

**This course is commercially supported.*

THURSDAY, JULY 21, 2022 | DAY 1

10:30 a.m. – 12:30 p.m.
WORKSHOP

Dental Hygiene Products | 2 CE | \$10
Something New, BeYou!

Shannon Nanne, RDH

Objectives:

- List the oral implications reported by patients from ingredients of dental products and how they can affect the oral cavity.
- Discuss management options for educating patients and improving their quality of life by understanding the chemistry of dentifrices and oral rinses.
- Understand the functions of saliva and it's natural benefits in the mouth.
- Identify successful treatment options and products available to remove plaque biofilm up to 84,000 movements per minute with sonic toothbrushes.
- Discuss the importance of interdental space – cleaning gently and yet effectively in combating dental caries, gingivitis, periodontitis and halitosis.

Do we know what are our patients cleaning their teeth with...their health is in our hands! Chemistry is key to the future success to our patient's health and overall well-being. Our recommendations will have them achieving good oral health practices from the beginning of their lives to the final days of oral care. Patients should be given the same counseling no matter what the age is. Defining an excellent product can be challenging but staying on this path you will never go wrong.

10:30 a.m. - 12:30 p.m.
WORKSHOP

Evidence Base Care | 2 CE | \$10

Testing, testing.....one, two, three – How accurate data can change the conversation and the outcomes

Anne N. Guignon, RDH, MPH, CSP

Learning Objectives:

- Understand the urgency for adding salivary diagnostics
- Describe basic salivary testing steps
- Appreciate the value of knowing both salivary pH and buffering capacity
- Find out how to successfully implement salivary testing protocols
- Discover the value of testing salivary microbes
- Learn how to test the pH levels of beverages/medications/supplements/plain water
- Recognize how testing improves communication and treatment acceptance

Do you have patients who have new decay at every visit or struggle with dentinal hypersensitivity or suffer from a burning mouth? Do you see teeth that are visibly melting away? The struggle is real. Basic salivary testing can shed a light on why patients continue to have disease. Emerging diagnostic testing can add more pieces to the puzzle. Are you ready to incorporate testing, secure more accurate diagnostic data, and gain a higher case acceptance by helping patients finally achieving health through homeostasis?

The Business of Hygiene | 1 CE

Premedication guidelines for dental professionals

Susanna Scherer, RDH, BS

Objectives:

- Define the etiology of bacteremia and identify the incidence of bacteremia reported for daily activities vs. a dental cleaning.
- Review the history of antibiotic prophylaxis.
- Understand the current AHA, ADA and AAOS guidelines for antibiotic prophylaxis prior to dental procedures.
- Examine the role of dental professionals toward antibiotic stewardship.
- Recognize that maintenance of good oral health and regular access to dental care is more important than AP for a dental procedure.

Commercially supported by:

Compared with previous recommendations, there are currently very few patients who require antibiotic prophylaxis (AP) prior to dental procedures. The purpose of this course is to help dental professionals understand the current guidelines for AP prior to dental procedures. We will examine the growing concern for antibiotic resistance and the role of dental professionals toward antibiotic stewardship. This course will also focus on the 2021 AHA Scientific Statement which reaffirms the 2007 recommendations that emphasizes good oral health and regular access to dental care as more important than AP for a dental procedure.

CONFERENCE DETAILS

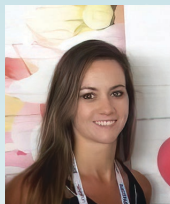

THURSDAY, JULY 21, 2022 | DAY 1

1:30 p.m. – 2:30 p.m.

MINI GENERAL SESSION

Oral-Systemic Health | 1 CE

Let's face it—Something may not be right!

Lacy Walker, RDH, CDA, CPFDA, MAADH, FAAOSH

Objectives:

- Identify nutritional deficiencies that can be seen on the face and in the oral cavity
- Discuss how optimal nutrition plays a role in overall health
- Assess the dental patient for airway issues that could affect a person's lifespan
- Understand how systemic issues can affect your skin and oral health

Have you looked at someone and thought they could be deficient? Deficient in sleep, vitamins, minerals, oxygen, or water? Our face tells a story. It tells us our past, present, and future. This course will demonstrate an understanding of how we can recognize deficiencies in sleep, vitamins, minerals, oxygen, and water all by looking at the face and mouth. The face tells a story of how well our airway is currently and while it was developing during childhood, our current dietary choices and deficiencies, how well we sleep today, and if we are deficient in optimal water intake. There are many factors associated with the overall health of a patient, and recognizing the facial and oral signs of deficiencies is paramount in helping patients achieve overall health.

1:30 p.m. – 2:30 p.m.

MINI GENERAL SESSION

Communication and Patient Compliance | 1 CE

My bad habits lead to you

Erin Haley-Hitz, RDH, MS, PHRDH

Objectives:

- Define basic health and wellness coaching techniques to motivate patients
- Identify the power within the patient to achieve successful habit building
- Construct new habit building with the utilization of patient self-determination and self-efficacy
- Regain passion for the profession and let go of the power struggle with patients

Building good habits is the backbone of all health and wellness success for patients regardless of the practice setting. By bringing a coaching mindset into the dental setting, dental hygienists will have more success in motivating patients to achieve better success within their oral health routines, ultimately affecting their overall total health. When we make the mistake of always remaining in the expert seat, we can make the experience in the dental chair more about the provider than the patient. By supporting patient autonomy, we can create patient-driven goals, which will then result in patient-driven results. As dental hygienists, this is what we strive for: less stress and more fun in our career through healthy habits.

Patient Care & Self Care | 2 CE

You and your patients' brain health—What you can be doing now

Angie Stone, BS, RDH

Objectives:

- Understand the role of the dental hygienist in assisting patients to maintain brain health
- Describe various modalities available to ward off cognitive decline for all people
- Be comfortable having conversations with patients regarding the connection between oral and brain health, no matter the patients' age

The brain is the most complex organ in the body. It controls thought, memory, emotion, touch, motor skills, vision, breathing, temperature, hunger, and every process that regulates the body. Without an adequately functioning brain, people become a shell of a human.

Environment, lifestyle choices and genetics are directly correlated with brain health. What is not being taught is how making choices and taking action can assist with the maintenance of brain function, as well as increase quality of life, and longevity.

As the medical professional who likely sees and spends the greatest amount of time with patients, dental hygienists are perfectly positioned to share this information. In fact, hygienists have an obligation to provide information regarding the causation relationship poor oral health has to brain health.

By sharing the concepts learned in this course with patients, family, and friends, and practicing brain maintenance themselves, hygienists can have a profound effect on reducing the number of people who suffer from cognitive decline. It's possible.

Angie is excited to share this life-changing information with you! Come feel her passion, be inspired, have some fun, and likely walk away feeling a smidge better than you did before the course!

StandOut Relationships... Life Would Be Easy, If it Weren't for Other People

Connie Podesta

The Power of Personality and Communication to Increase Engagement

Life continues to shift in ways we never imagined. People working remotely, virtual meetings taking over, families bridging gaps on zoom... Communication skills have NEVER been more important than now! At work and at home. Connie is your go-to guru for understanding just exactly how this people puzzle works so you can get your message across whether live or from a screen.

Imagine what you could accomplish if you could decode the mystery of human behavior and truly understand what makes people do what they do and say what they say (including yourself!). Research shows that the **#1 key to SUCCESS** is the ability to get along with other people, personally and professionally.

Bottom line: How you **choose** to relate to, communicate with, be accountable to, resolve conflict with and garner respect from other people will directly impact your future. Most importantly, those skills will determine your ability to attract and sustain healthy relationships. And that is the key to a lifetime of success as you lead, manage, sell, produce, collaborate, work as a team, interact with friends and family, and strive to excel as a human being on this planet.

With laugh-out-loud humor, killer take-away strategies and her amazing insights into ourselves and others (including a few who “drive you crazy”), Human Relations expert Connie Podesta will both challenge you and empower you with the knowledge you need to get along better with the people in your life. Connie will take you right inside the minds and personalities of the people you deal with every day – bosses, colleagues, partners, customers, friends, and family so **YOU** can **ACT**, rather than **REACT** to whatever life throws your way. Get ready for less stress and more success!

Lasers | 2 CE

Implementing laser dentistry into your dental practice—Can you see the light?

Angie Wallace, RDH

Objectives:

- Gauge your initial understanding of lasers and their usage
- Discuss the fundamentals of lasers, including the production, characteristics, delivery systems, and emission modes of light
- Summarize the effects of lasers on tissue
- Examine treatment sequence and patient management

In this fast-paced 2-hour laser course, attendees will be caught up in the excitement of how lasers can send your career into a new direction that offers state-of-the-art technology and what lasers in the hands of dental hygienists have to offer. Angie Wallace, RDH, a renowned laser educator, will help guide you through lasers and how they work, what they can do, and how to complete all of this safely.

In this course you will:

- Review laser types, device characteristics, and clinical applications
- Reflect on today's laser safety standards and regulatory requirements
- Analyze practice management issues including financial and insurance considerations, malpractice, ethics, record-keeping, and informed consent
- Gain basic level understanding in dental laser usage

Join Angie in learning about lasers and become excited about what you can do for your patients and for yourself as a laser dental hygienist.

FRIDAY, JULY 22, 2022 | DAY 2

10:30 a.m. – 12:30 p.m.
GENERAL SESSION

Periodontal Disease | 2 CE

Let's stage and grade that perio patient—It's the right thing to do!

Lilian Caperila, RDH, BSDH, MED; Marianne Dryer, RDH, MED

2018 AAP Classification of Periodontal and Peri-Implant Diseases

Objectives:

- Discuss staging/grading for periodontal disease and how it will benefit patient care and management
- Create treatment modalities that are evidence-based protocols for specific types of periodontal diseases according to the new classification system

The AAP Classification System that rolled out in 2018 represents a multidimensional staging and grading framework for periodontitis and implant disease status. This course will examine the concepts of staging and grading to classify each patient by complexity of case management, likelihood of less predictable response to therapy, and potential for periodontitis development.

A hallmark feature of the updated system brings opportunities for more case-specific patient care. The need for calibration and clinician alignment with the new classification system along with appropriate treatment and home-care recommendations will be discussed.

10:30 a.m. – 12:30 p.m.

GENERAL SESSION

Geriatric | 2 CE

Brushing the ones you want to keep—Educating the aging population about their need for improving oral health care

William Paveletz, DMD

Objectives:

- Suggest different techniques and products to your patients so they will be more likely to accept restorative and preventive procedures
- Explain the implication of common chronic disease on geriatric oral health
- Describe how various improvements to current dental products can improve the patient's oral health

The purpose of this course is to provide dental professionals with information regarding oral manifestations of the aging process and their relationship with oral and systemic health to ensure the maintenance of optimum quality of life in older patients. Dental statistics show today's senior dental patients are a growing part of a dental practice. For some dental staff, these patients are a joy; for others, they are a challenge to treat.

Senior patients have a different outlook regarding dentistry than their parents. These individuals do not believe they have to lose their teeth to the aging process. Many have the financial means to invest in their dental treatment, but only if they feel comfortable with the care and guidance from their dental team. These expectations can be challenging to any team member. The ability of the dentist and staff to navigate through a series of medical conditions, medication therapies, and personal needs can be overwhelming at times.

WORKSHOP

Communication & Patient Compliance | 2 CE | \$10

Gaggers, uptight, and upright folks - Strategies for treating “those patients”

Anne N. Guignon, RDH, MPH, CSP

Learning Objectives:

- Recognize how to defuse patient anxieties and gain their trust
- Discover more effective ways to position yourself and the patient
- Appreciate how medical conditions can complicate a dental visit
- Learn to effectively identify and treat dentinal hypersensitivity
- Understand why people gag and how to minimize the episodes
- Increase team support when treating complex patients

Do you really know how to best serve an anxious patient? What about one who resists reclining, or the person who can't turn their head, or is confined to a wheelchair? How do you deal with a patient who complains that every tooth is sensitive? And what about those gaggers? And what is the best way to respond to the patient who gives you a big eye roll while you're just trying to do your job? No one ever said practicing dental hygiene would be easy, but if you've been in practice more than 5 minutes, you know these real-world challenges exist. Who wants to be annoyed with a patient? No one! Learn how to decrease these frustrating experiences with creative accommodations where you can provide better treatment that does not leave you feeling so depleted.

1:30 p.m. – 2:30 p.m.

MINI GENERAL SESSION

Medical Emergency | 1 CE

The power of prevention: Medical emergency protocols for the dental hygienist

India Chance, BSDH, RDH

Objectives:

- Recognize the signs and symptoms of common medical emergencies
- Learn to collect and analyze data acquired during a health history assessment to identify if a patient may be at risk of experiencing a medical emergency
- Identify the appropriate items that should be included in a basic first aid kit that will assist in managing a medical emergency
- Describe what a medical emergency management response plan should include and implementation steps

The purpose of this course is to equip the dental hygienist with the knowledge to recognize, treat, and prevent medical emergencies in a dental health-care setting. The number of medically compromised dental patients taking prescribed medications is increasing and contributing to an escalation of medical emergencies occurring during dental appointments. This course will address the most common medical emergencies an RDH might experience and provide instruction on recognition, treatment, and prevention methods. An emphasis will be placed on the assessment step of the dental hygiene process of care to illustrate its crucial role in preventing a patient medical emergency. At the end of this course, attendees will be able to identify common medical emergencies, treatment options, and prevention methods.

1:30 p.m. – 2:30 p.m.

MINI GENERAL SESSION

Communication and Patient Compliance | 1 CE

Afraid of the dentist: Managing anxiety in children

Melia Lewis, MEd, BSDH, RDH

Objectives:

- Discuss causes of childhood anxiety
- Analyze the need for positive medical and dental experiences for the population
- Discuss behaviors and personality traits of patients who have childhood anxiety
- List common medications used to treat childhood anxiety and dental and medical contraindications
- Discuss communication techniques and calming strategies to have a successful appointment with your patient

Mental health has most definitely come front and center in society lately, especially with these last two years of change and uncertainty. No one could be faulted for feeling a little extra strain and stress. However, a sometimes-forgotten population that has taken the brunt of much of the stress is children. Childhood mental illness is being diagnosed at an all-time high, which means we will be seeing these patients more in our offices. Dental hygienists have a unique opportunity to work with and help one-on-one in a sometimes stressful situation. Learning about these conditions, medications, special contraindications, and coping mechanisms will make the dental office a safe space for our tiniest patients.

GENERAL SESSION

Pharmacology | 2 CE

Hurts so...swell!: What every dental hygienist needs to know about managing acute dental pain with non-opioid and opioid analgesics and the opioid crisis

Tom Viola, R.Ph., CCP, CDE, CPMP

Objectives:

- Describe the pharmacology of opioid and non-opioid analgesics, including mechanisms of action as well as their potential for abuse
- Identify the intended role of opioid and non-opioid analgesics in the treatment of acute dental pain
- Describe strategies for developing a pain management plan that is individualized for a patient's needs and medical conditions
- Explain the impact of the excessive use of opioid analgesics on our communities and considerations for the dental hygienist

Management of acute dental pain is accomplished through a clinical approach that successfully incorporates opioid and non-opioid analgesics. However, this normally occurs outside the dental office, away from our immediate supervision, and we are often faced with the difficult task of effectively managing patient pain while also avoiding adverse outcomes for both our patients and our communities. This program will provide an overview of the use of opioid and non-opioid analgesics and analgesic adjuvants in the effective management of acute dental pain. Using case scenarios, special emphasis will be given to the excessive utilization of opioid analgesics, the impact on our communities, the burgeoning national opioid epidemic, and considerations for the dental hygienist.

SATURDAY, JULY 23, 2022 | DAY 3

8:00 a.m. – 10:00 a.m.
GENERAL SESSION

Preventive Dentistry | 2 CE

Working SMARTer: It is not just for kids. Going deeper with the many uses of silver diamine fluoride

Kyle Isaacs, RDHEP, BHS

Objectives:

- Explain the various uses of silver diamine fluoride for both caries arrest and prevention as well as the uses for SMART
- Recall the history, safety, and positive impact silver diamine fluoride has had on the oral health of many people from babies to centenarians
- Describe the science of silver diamine fluoride and glass ionomer cements
- Become more comfortable in utilizing silver diamine fluoride in everyday practice

Caries is the most common chronic childhood disease that is completely preventable. Traditional approaches of drill, fill, and oral hygiene instruction are not working. Telling parents, children, and caregivers to cut back on drinking sugared and acidic beverages as well as fermentable carbohydrates and to have better oral hygiene has not helped change the caries epidemic. Even treatment under general anesthesia does not take care of the disease, as it results in high recurrent caries rates as well as greater costs, both monetarily as well as possible long-term effects for children.

Children are not the only ones affected by caries and potential problems. The elderly, special-needs patients, rural communities, cancer patients, nursing home residents, people with diabetes, dry mouth sufferers, and people with little to no resources for seeing a dentist are at higher risk of poor outcomes. One thing that has been shown to change the caries rate is silver diamine fluoride (SDF). SDF implementation to arrest caries infection has been used around the world for over 50 years, yet we are still too slow, and for some people, too late to adapt and implement. Not only can we utilize the combination of silver diamine fluoride and glass ionomer cements for minimally invasive dental treatments, but we can now use SDF preventively in myriad ways. This informative course will prove to us that choosing silver diamine fluoride will not only stop decay but also prevent the infection in our most vulnerable patients.

SATURDAY, JULY 23, 2022 | DAY 3

8:00 a.m. – 10:00 a.m.
GENERAL SESSION

Ergonomics | 2 CE

Oh, what a pain! A multifaceted approach to improving dental professionals' health and well-being inside and outside the operator

Schelli Stedke, RDH, MDH, RYT, CHC

Objectives:

- Understand the importance of ergonomics in dentistry and how human factors and equipment interactions may affect health
- Detect warning signs of musculoskeletal disorders and implement preventive techniques to avoid pain in the dental operator
- Recognize the role that allopathic and complementary medicine has on overall health and treatment options for the dental hygienist
- Compare and contrast modalities of self-care, discussing implementation of a multifaceted approach that could help long-term physical comfort and increase career satisfaction and longevity

Physical pain is a well-known and documented issue that most dental professionals face during their career. Ergonomic positioning has long been taught in educational curriculums; however, the number of musculoskeletal disorders reported and work lost due to physical pain is still significant. The nature of musculoskeletal disorders is not uniform and there is no singular solution to prevent their onset. In this course, common musculoskeletal disorders that dental hygienists face will be highlighted. Human factors and equipment interaction will be discussed and considered for optimal outcomes. The importance of proper ergonomics will be reviewed, and innovative as well as classic techniques of self-care will be introduced and discussed. Additionally, a multifaceted approach to practitioner health and rehabilitation that considers and combines traditional allopathic medicine and complementary alternative medical approaches that include nutrition, yoga, acupuncture, breath work, and meditation will be supported. Finally, motivational factors for change, habit formation, and long-term health will be discussed with the goal of introducing ways to incorporate various practices into daily life that improve long-term physical health and satisfaction in the dental operator.

8:00 a.m. – 11:00 a.m.
WORKSHOP

Lasers | 3 CE | \$10

Light Up Your Operator: An Introduction To Diode Lasers For Today's Modern Hygienist

Valerie Dangler, RDH, BSDH and Kristy James, RDH

Learning Objectives:

- Evaluate what is a diode laser, what are the benefits of use for the dental hygienist, the patient, and the practice?
- Learn how we can improve patient care while practicing safely.
- Provide a "hands-on" experience that will leave the hygienist feeling empowered to implement lasers into practice.

Commercially supported by:

During this workshop we will highlight the latest trends in dentistry that will improve the way we practice dental hygiene. We will focus on the introduction to Diode lasers and evaluate the significance lasers have in today's comprehensive model of care.

CONFERENCE DETAILS

SATURDAY, JULY 23, 2022 | DAY 3

10:30 a.m. – 12:30 p.m.
GENERAL SESSION

Implants | 2 CE

Between the threads: Uncovering comprehensive implant therapeutics for the dental hygienist

Katrina Sanders, RDH, BSDH, M.Ed, RF

Objectives:

- Review the dental hygiene process of care as it relates to assessing, diagnosing, planning, implementing, and evaluating the dental implant candidate
- Discuss the optimal dental hygiene process of care for an active dental implant patient
- Describe the American Academy of Periodontology standards regarding the diagnostics of periimplant disease, including therapeutic opportunities for a stage IV patient
- Identify appropriate preventive and therapeutic modalities as well as advanced periodontal procedures designed for dental implant patients
- Discover futuristic trends in the provision of dental implant therapeutics

Commercially supported by:

waterpik®

The American Academy of Implant Dentistry estimates about 3 million dental patients in the United States have dental implants with a projected 500,000 implants being placed each year. In many cases, dental implants are utilized as a means of replacing decayed, diseased, or periodontally involved teeth in oral conditions that are less than favorable. As research continues to unpack data around the increasing failure rate of dental implants in previously or actively diseased oral conditions, the role of the preventive dental hygienist becomes increasingly imperative.

Join periodontal hygienist, speaker, author, and consultant Katrina M. Sanders, RDH, BSDH, MEd, RF, as she uncovers the modalities of complex care for the dental implant patient. This comprehensive program looks between the threads to better understand the crucial role of the dental hygienist in identifying potential dental implant candidates, evaluating systemic conditions affecting dental implant success, assessing stable and diseased periimplant sites, diagnosing stage IV and periimplant diseased cases, maintaining single, multiple, or all-on-four/all-on-six patient cases, and actively treating periimplant diseased patients. Let's establish and maintain a stable foundation of dental implant protocols while considering the research and uncovering new trends and techniques aimed to elevate comprehensive standards in the provision of dental implant care.

SATURDAY, JULY 23, 2022 | DAY 3

10:30 a.m. – 12:30 p.m.
GENERAL SESSION

Oral-Systemic Health | 2 CE

Super healer, super hero: Changing our focus to a biological dental health approach for the 21st century

**Barbara Tritz, RDH, BSDATE, MSB, HIAOMT;
Kriston Reinsour, RDH, BSDH, CCSH, CSOM, FAAOSH, HIAOMT**

Objectives:

- Differentiate between the types of inflammation with a focus on the chronic inflammatory process
- Identify gut dysbiosis and provide your patients with a nutritional game plan to address gut health
- Uncover and identify airway, breathing, and sleep-related issues that determine a patient's overall inflammatory burden contributing to chronic disease
- Create a biological treatment plan that promotes and treats the mouth while supporting and enhancing the health of the entire body

Venture beyond traditional dental hygiene philosophies and practices to become the true healer, super health-care professional, and keystone provider you've always longed to be. We need to question traditional belief that a prophylaxis by itself will make an unhealthy mouth healthy. Look deeper than your scaler and polisher to gain a complete understanding of how inflammation, the immune system, gut dysbiosis, poor nutritional habits, and even orofacial disorders all play a role in oral and systemic health. This course will provide you with up-to-date information and techniques that can confidently be applied in a biological 21st century dental hygiene practice. Fall in love with your profession all over again and elevate your patients' care while utilizing a modern evidence-based approach.

“ It is the best event of the year!!!
Totally dedicated to hygienists. Best speakers and topics. I could spend a full day & more on in Exhibit Hall. Learn and see products you won't find anywhere else. All the latest and new up and coming companies with innovative products. ”

CONFERENCE DETAILS

SATURDAY, JULY 23, 2022 | DAY 3

10:30 a.m. – 12:30 p.m.
GENERAL SESSION

Diversity/Cultural Competency | 2 CE
Caring for the Latin community with sazón (flavor)

Amber Lovatos, RDH, BSDH, MAADH

Objectives:

- Identify barriers to dental care in the Hispanic and Latin communities
- Modify care to increase comfort among Hispanic and Latin patients
- Differentiate between Latin and Hispanic patients
- Incorporate culturally appropriate language into care

Have you ever wished you could do more for your patients but found that culture has been a barrier? I think we have all noticed there is certain misinformation passed along in different cultures. Even as health-care workers, we often experience this with our own families. As a Mexican American myself, I know a great deal of the different “medical tips” that are passed along from our favorite tia (aunt) or the overly helpful vecino (neighbor). These behaviors are far too common in the Hispanic and Latin communities. They are also behaviors I try to understand and empathize with so that I can better care for my minority patients. In this course, you will learn the “why” behind some of the behaviors in the Hispanic and Latin communities. You will become familiar with the nuances of dealing with Latins, environmental factors that contribute to their decision-making, and learn how to leverage our similarities. The meta or goal of this course is to equip dental professionals to better understand the cultural factors affecting our patients’ behaviors so we can increase equity in the minority community.

10:30 a.m. – 12:30 p.m.
WORKSHOP

Oral-Systemic Health | 2 CE | \$10
Join the Oral Systemic Movement! Stop Guessing & Start Testing

Lora Hooper, BSDH, RDH, EFDA

Learning Objectives:

- Understand why oral is systemic
- Know why to test, who to test, and how to test with salivary diagnostics
- Learn how to use testing results to personalize periodontal treatment
- Practice using chair side guidebooks, resources and key communication strategies to implement testing

Commercially supported by:

Have you been struck by the “Curse of Hygiene?”

- Guessing what is causing the periodontal infection - only to blame the patient in needing to brush and floss more
- Guessing the severity of the periodontal infection - only saying a little bleeding and then needing a tourniquet by the end of the prophylaxis
- Guessing the best treatment for the periodontal infection - only to move from one product to the next needing a better solution for recurrent disease

Well it's time to stop the “Hygiene Insanity”- doing the same thing over and over again expecting a different result. Participate in this hands- on workshop where you will have the opportunity to saliva test yourself. You will learn key strategies from oral systemic presentation techniques to personalized treatment planning based on your test results. In the process you will utilize chair side guidebooks, resources, and key communication to be able to implement into practice immediately.

Clinical Dental Hygiene | 2 CE

Overcoming overwhelm and finding the path to joy and fulfillment in your career

Josey Sewell, RDH

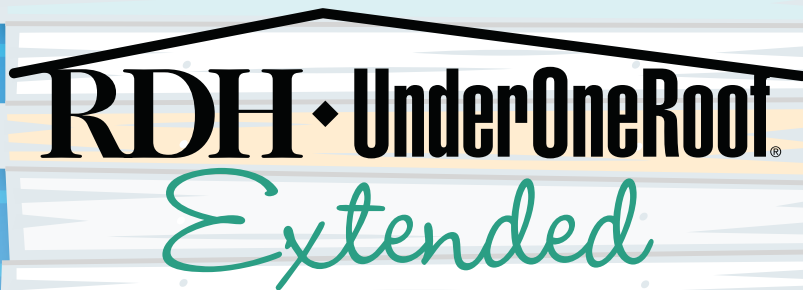

Learning Objectives:

- Identify the root causes of overwhelm and burnout
- Strategies to strengthen mental, physical, and spiritual health
- Learn communication tips how to discuss sensitive topics like overwhelm or burnout with your boss
- Create win-win-win solutions for you, the practice, and the patient
- Translate metrics and numbers into value and patient impact
- Discover ways to find joy and fulfillment at work

Commercially supported by:

PHILIPS

Can we all just admit we are exhausted? Can we stop pretending burnout and overwhelm isn't a serious threat to our lives, our careers and our profession at large? We are seeing an unprecedented number of hygienists who are considering decreasing the time they spend in direct patient care and perhaps leaving dentistry altogether. Is this due to the stress of patient care, the proverbial "bad boss", the physical pain caused from doing hygiene day after day, or is it something else altogether? In this course we will examine practical ways to assess and address your feelings of overwhelm or burnout (whether you are clinical or non-clinical). From healthy habits to how to approach your boss with a sensitive conversation- you will walk away from this presentation with a fresh perspective, practical tools and renewed energy to chase your passions- no matter what they are.

The logo is presented on a white wooden sign with horizontal planks, hanging from two wooden pegs. The text "RDH • UnderOneRoof" is in a bold, black, sans-serif font, with a registered trademark symbol. Below it, the word "Extended" is written in a green, cursive script font.

Evolution

**Announcing the 2nd
Live RDH Evolution
conference for dental
hygienists who are
passionate about
evolving their career!**

- *RDH Evolution* provides a unique opportunity for dental hygienists to learn from their peers how to get the most from their career.
- Attendees will focus on professional development, goal setting, clinical expansion, speaking skills, and how to be published.
- Attendees will meet and learn from other like-minded dental professionals, while networking with corporate sponsors who hire and work with dental hygienists.
- This career enhancement program will accelerate your career goals as you work with motivated dental hygienists and understand how they used their skills to expand their expertise both in and out of the clinic.

**Register before
May 31, 2022 for
just \$399**

Benefits of Attending:

- Learn directly from dental hygiene thought leaders you recognize
- Grow from interactive discussions and define your next steps
- Build your network with mentorship opportunities
- Interact with corporate sponsors to learn how hygienists support their business

**Scan the QR code

AMBASSADOR PROGRAM

SIGN UP TO BE A RDH UnderOneRoof Ambassador

Do you know dental hygienists that would benefit from attending
RDH Under One Roof?

Do you tell everyone you know about the event?

Then it's time you are rewarded for being an
RDH Under One Roof Ambassador!

1. Send an email to registration@endeavorb2b.com requesting to become a 2022 Ambassador. Registration will send you a unique code for you to send to your friends and colleagues
2. At least two first-timer attendees must register (and pay) as full conference registrants using your unique promo code
3. Get rewarded and win prizes!

2021 AMBASSADORS, from left to right: Jennifer Stanley, RDH; Cynthia Miller, RDH; Lacy Walker, RDH, CDA; Valerie Dangler, BSDH, RDH; Martha Ramirez, BS, RDH; and Danielle Grotheer, BSDH, RDH, CDA. Not pictured: Nicole Lehar, RDH, and Carleen Signore, RDH.

- Contests and free samples
- Feature articles
- CE credit opportunities

ENEWSLETTERS

RDH eVillage.

RDH eVillage is a weekly opt-in e-newsletter that is prepared for dental hygiene professionals who are looking for hard-hitting current information. Each issue contains clinical tips, new products, industry news, answers to clinical questions, practical up-to-date articles, surveys, continuing education, and more.

RDH Graduate

RDH Graduate is an e-newsletter for hygiene students and new hygienists. Dental hygiene's newest practitioners face the challenge of keeping up with the quickly evolving dental profession. RDH Graduate provides timely information for dental hygiene students and recent graduates to help them stay abreast of changes in treatment protocols, technology, and career choices.

Through the Loupes

YOUR CHAIRSIDE COMPANION FOR CLINICAL AND PRODUCT UPDATES

The Through the Loupes daily newsletter provides case studies and product information to help you expand your clinical acumen. The newsletter is directed by Stacey Gividen, DDS, and Pamela Maragliano-Muniz, DMD.

Morning Briefing

The Morning Briefing daily newsletter keeps you current on the latest developments in dentistry, including those related to the coronavirus pandemic. It combines the resources of *Dental Economics*, *DentistryIQ*, *Perio-Implant Advisory*, and *RDH magazine*.

PLANNING YOUR TRIP TO ORLANDO, FL

200+ STORES, 250+ RESTAURANTS

All just minutes from the Gaylord Palms Resort and Convention Center

RDH Under One Roof welcomes you to Orlando, Florida—the City Beautiful!

Orlando is home to several unique dining, shopping, amusement parks, and entertainment options. Come and discover the adventures Orlando has to offer. The adventurous and entertaining city of Orlando is sure to delight you.

Orlando offers numerous mouthwatering cuisine dining spots that make for an ultimate dining experience. From celebrity chef-driven restaurants, dazzling nightclubs, sleek lounges, family-friendly feasts, these choices should appeal to any budget or preference. From trademark breweries, wineries, gourmet food trucks, and sports-focused pubs, you are sure to never run out of amazing places to eat or drink in Orlando.

There is a diverse blend of more than several hundred retailers. Whether you prefer megamalls with well-known stores or charming boutiques, the Orlando shopping scene has something for everyone. Best of all, Disney Springs is nestled next to the Gaylord Palms Resort and Convention Center, which gives you the opportunity to explore even more shopping venues.

Orlando is the perfect destination for the whole family. Between the several parks, walking trails, and airboat tours, there is plenty to explore. Enjoy the crystal-clear waters that make for great scuba diving, snorkeling, swimming, and/or fishing, not to mention manatee encounters. Discover birdwatching, hiking, biking, kayaking, ziplining, and more, all within the city limits.

Enjoy some summer family fun at Walt Disney World, Universal Studios, SeaWorld, Legoland, and water parks. From piano bars to clubs, you can discover live classic music, dinner shows, and nightlife entertainment. People can enjoy amusement parks during the day and stop by a local brewery for some craft beer and live music in the evening.

We can't wait to see you at **RDH Under One Roof 2022!**

DEPOSIT INFORMATION

The credit card used to guarantee this reservation will not be charged in advance.

TIPS TO GET YOUR DENTIST TO PAY

YOUR ATTENDANCE IS WORTH THE INVESTMENT!

3 easy steps to convince your dentist to contribute financially to your trip

1. DO YOUR RESEARCH

Identify conference sessions that satisfy your professional goals. Use our Interactive Floor Plan to locate exhibitors that address specific needs within your office. Prepare a list of benefits that you can achieve by attending **RDH Under One Roof**.

2. SHOW HOW EVERYONE BENEFITS

Share your event goals with your office and demonstrate how your participation will help your team achieve their goals. Offer to give a presentation upon returning from RDH Under One Roof to share any new ideas or products that you learned about during the event.

3. GAIN BUY-IN

Write out your ideas and submit them to your dentist with your intended schedule of conference track subjects and the list of companies you hope to network with. Include the cost of airfare and lodging and make sure your manager knows a Full Conference Registration includes two days of lunch!

Visit <https://www.rdhunderoneroof.com/rdhuor2022/tips> to download and customize the Letter to Your Supervisor to get started.

REGISTRATION INFORMATION

Registering for RDH Under One Roof is easy! Consult the table below to decide which registration option is right for you– The First-Timer Full Conference and Alumni Full Conference options offer the best value.

WHICH REGISTRATION TYPE IS RIGHT FOR YOU?
